Introduction

Course Description and Philosophy

Right is a six-level communicative course intended for students studying English for the first time. *Right* specifically targets EFL (English as a Foreign Language) students who are unfamiliar with English and don't hear it spoken outside of the classroom. The aim of the series is to develop students' speaking, reading, listening, and writing skills.

Right 2 is an A1 breakthrough level, according to the Council of Europe Standards.

With a strong emphasis on helping students communicate in English in their everyday lives, the syllabus progresses at a steady pace encouraging and building confidence in students right from the start. Each unit features new vocabulary and phonics words for students to learn and use in everyday conversations. Reading passages and conversations featured in each unit expose students to popular and common English expressions.

Children naturally love songs and rhymes which *Right* utilizes in the first two grade levels. *Right* 2 includes three songs at the end of the book which comprises some of the vocabulary and grammatical structures learned throughout all the units. Students have fun singing, reviewing, and solidifying words and concepts at the same time.

Right also emphasizes communication within a carefully controlled grammatical syllabus. Combining vocabulary words within a particular grammatical structure provides students with the means to communicate in a correct manner.

Each unit contains listening activities and exercises that guide students through the correct pronunciation and intonation of the language.

Right combines active English learning with a variety of lively theme-based units. Students relate to the themes and situations that occur throughout the book resulting in greater language acquisition. The recurring characters in the series – Stella, John, Sarah, Helen, Harley, Hansel, Tom, Jack, Bebo the squirrel, Lolo the cat, and Tilly the dog – engage and interest students throughout the series.

Right incorporates techniques from proven and successful methods of teaching children English. Some of the methods used throughout the series include:

- **The Functional Approach,** which emphasizes the proper context in which to use certain language patterns and expressions.
- **The Communicative Approach,** which is based on the idea that language used in the classroom should be used to communicate thoughts and feelings that are meaningful to students.
- **The Grammatical/Structural** approaches, which examine grammar, focusing on patterns and structure in language to aid comprehension and retention.
- **The Audio-Lingual Approach**, which focuses on the sounds and syntax of the language.

Right is designed to be preceded by the two-level introductory course *Start Right*. Both series can be utilized separately or combined for on eight-level course. *Start Right* provides students with a solid start on a wealth of vocabulary and simple grammar structures, helping them to communicate from the beginning.

Each level of *Right* includes most if not all of the following components: Class Book, Workbook, Teacher's Book, Teacher's Resource Pack which includes posters and flash cards, and Big Book which features review stories in a beautiful and enlarged format, Class Book and Workbook Audio CD.

Course Components

Class Book

The Class Book contains wonderful color illustrations combined with a simple and attractive format. Students are drawn into the book through the engaging illustrations, gaining their attention and maintaining their interest throughout the book. This also provides the teacher an option of getting students to communicate through the illustrations. *Right*, Grades 1–3, include 10 units per Class Book. Each unit contains six pages. The short units allow students to progress quickly, resulting in greater motivation and confidence in students. After every two units, a four-page review follows to help students review and solidify concepts learned.

Workbook

The Workbook is a natural extension of the Class Book. Students have even more opportunities to practice what they learned in the Class Book. Each unit of the Workbook contains six pages filled with a variety of exercises that engages students of various learning styles. It is flexible enough to use within or outside of the classroom. The Workbook provides teachers a further means of assessing student comprehension and retention.

Teacher's Book

The comprehensive Teacher's Book provides teachers with the means to teach the Class Book in the most effective way.

The Lesson Plans contain activities designed to present, practice, and reinforce the new language. With step-by-step lesson plans, guidelines and tips throughout, teachers will feel confident in teaching their lessons in front of the class and students will gain greater benefit from the lessons, too.
The Teacher's Resource Guide provides teachers with the techniques and skills needed to teach their lessons and helpful suggestions for classroom management.

The Class Book and Workbook Instructions and Answer Keys provide teachers access to introducing the units and checking students' work.

The Worksheets are photocopiable and provide additional support to the Class Book.

The Test Instruction and Answer Key allow teachers and parents to assess students' level of comprehension and their progress throughout the course.
The Games and Activities section helps to keep classes lively and interesting for students.

Contraction Cards help students to learn their

contractions.
Phonics and Word lists are provided for teacher reference.
Award certificates are for students who achieve and complete goals throughout the course.
An audio tapescript of the language and dialogues that appear on the Audio CD is included in the teacher's notes.

Big Book

The Big Book is an extension of the Review Stories found within the Class Book. The Big Book contains large and colorful illustrations that capture the attention of students in a visually appealing manner. Besides inviting illustrations, the stories within the Big Book introduce students to the wonderful world of reading through engaging stories that center on the characters in the series.

Class Book and Workbook Audio CD

The listening exercises and activities that make up the Class Book and Workbook are included in Audio CD. These include the following:

a phonics
b vocabulary
c reading
d language patterns
e dialogues
f narratives
g listening exercises
h numbers
i original songs

Students will have fun listening to native speakers of English read stories and help them through activities and exercises throughout the book. Lively and fun music complements the CD to engage students to the fullest.

Teacher's Resource Pack

The Teacher's Resource Pack includes posters to hang in the teacher's classroom to offer support in teaching the units. Also included are flash cards that provide the teacher with the means to engage students in fun activities to enhance student learning.

Organization of a Unit

Right 2 Class Book comprises 10 units and 5 review units. Each unit centers on vocabulary from a particular theme or topic. The vocabulary is then introduced in an appropriate grammatical structure. Students learn how to use the new vocabulary they have acquired in related sentences.

Each unit contains six lessons: *Right Phonics, Right Vocabulary, Right Reading, Right Conversation, Right Grammar, and Right Activities.* Each unit builds on previously learned language and introduces new vocabulary and structures. Each lesson focuses on a specific purpose in language development.

***Right* Phonics** builds upon the phonics introduced in Start *Right* and gives special attention to letters and sounds that are of particular confusion to EFL students. Students listen to the pronunciation of the words and repeat the words themselves. Each word is represented by a picture to aid in understanding and retention. The phonics words are further practiced through exercises in *Right* Activities.

***Right* Vocabulary** consists of words that are common within a particular topic. Students listen and repeat the words to ensure correct pronunciation. A full-page colorful illustration provides a visual representation of the words

in an engaging and kid-friendly scene in which students can relate. The vocabulary words extend throughout the unit including in *Right* Reading.

***Right* Reading** encourages reading fluency by reintroducing the vocabulary words that students are already familiar with from *Right* Vocabulary. While listening and reading along through the engaging stories and narratives centered on the characters of the *Right* series, students will have fun reading. The *Right* Reading section also prepares students for *Right* Practice by introducing the grammatical structures of the unit.

***Right* Comprehension** introduces a set of one to two comprehension questions about the reading passage that preceded it. Teachers can assess the reading comprehension level of the students. The comprehension questions can also generate further discussion about the reading passage to engage students at a deeper level about what they read.

***Right* Grammar** builds grammatical accuracy. Students practice the vocabulary within the context of a particular sentence and question pattern. This building sequence allows students to make statements as well as to respond to questions. Like the majority of *Right*, students have the opportunity to listen to the correct pronunciation and intonation of the words.

***Right* Activities** reviews and reinforces the language and concepts learned throughout the unit. With a variety of reading, writing, and listening activities to include many learning styles, teachers can assess how well students understood the lesson. Students can see their strong areas and areas that need more attention.

Motivate Your Students

Motivated students learn better and acquire language skills at a faster pace. When overall motivation is high, students behave well and participate fully in activities.

Here are some suggestions to keep your students motivated throughout the course.

- Be an enthusiastic and motivated teacher. Smile and always encourage when you can. Your enthusiasm will affect your students. A positive classroom atmosphere stimulates creativity and student participation.

- Engage students with activities in which all students can participate.

- Praise good behavior, helpfulness, and language proficiency. Give students award certificates (available towards the end of this book) to acknowledge their successes. These are some words of acknowledgement that your students will appreciate:

- Good job!
- Well done!
- Good try!
- You've really improved.
- Try again.
- This is really great.
- Thank you.
- Thanks for helping me.
- You're a big help.
- What a great helper you are!
- I've really noticed how hard you are trying.
- Thank you for working so hard.
- Thank you for following instructions.
- You have been really patient.
- Keep up the good work.
- I'm very happy with your progress.

- Provide as many opportunities as possible for students to communicate in English. Students will gain confidence as language learners the more they are able to express themselves in English.

- Engage shy students in the class. Shy students may feel uncomfortable and lack the confidence to participate in activities. Make them feel important and successful. However, take care not to make students speak in front of the class if they are not ready to do so. Actions such as these may affect the student's motivation and self-confidence in a negative way.

Discipline is Important

A well-managed classroom can maintain motivation and keep discipline problems at a minimum.

- Students thrive when they know the boundaries. Make a set of class rules for students to follow throughout the class. Explain and discuss the rules with students on the first day of class. Display classroom rules where students can see them. Consistently maintain classroom rules and acknowledge students who follow them.

- Explain what is expected of students. Basic classroom expectations include appropriate behavior, student participation, trying to use the new language, and quality work.

Inappropriate behavior from a student can originate from many possible reasons. Consider these reasons behind students' actions and address the issue. Here are some possible reasons for behavior problems:

- The lesson content is not interesting or challenging enough for the student. Students lose motivation and interest when the lessons become repetitive.

- Lesson preparation is not adequate resulting in disruptions in the class. Come to class with well-prepared lessons so the class can proceed smoothly.

- The language level of the class is not in line with the student's abilities. Adjust lessons to accommodate the student's level.

- The teacher-student relationship is problematic. Rectify any issues with the student or his/her parents.

- Some students are attention seekers or more aggressive than others. Try to understand why the student is exhibiting this type of behavior and address it with the student or his/her parents.

- External factors such as weather, family problems, unhealthy diet, lack of sleep, or after-school activities can affect a student's behavior. Be aware of these factors and address them appropriately.

- Some students may have learning disabilities or special needs and therefore face greater educational challenges. Consult their parents or a professional if necessary.

Not Too Much Homework

Homework gives students the opportunity to reinforce and solidify the language and concepts introduced in class. It also provides parents with the opportunity to be involved in their child's learning. Here are some suggestions to motivate students to do their homework:

- Explain the expectations of students in the homework assignment. Do a few examples with the class to ensure students fully understand.

- Encourage students to ask any questions they may have in regards to the homework.

- Make sure the homework assigned is a manageable amount for the students. Don't load students down with an abundance of homework they are unable to complete.
- Reward students who complete homework even if it is not all correct. These rewards can be stickers, gifts, or positive feedback.

Learning Styles Includes All Children

People learn in different ways, and so students will have various learning styles. It is important to remember these learning styles when preparing lessons so that all students have an opportunity to learn in their style. This will lead to greater motivation and ultimately greater learning. Here are some suggestions for teaching students from the eight main learning styles.

- *Spatial/Visual:* Use visual aids such as maps, flash cards, and realia.

- *Kinesthetic:* Use movement with songs and games which can include running or clapping.

- *Musical:* Use body percussion (stamping, clapping, patting, snapping) to enhance songs.

- *Linguistic:* Use oral drilling or activities that require speaking.

- *Logical-Mathematical:* Do puzzles, sequencing activities, or classification activities that involve logical deduction.

- *Interpersonal:* Involve students in activities or games in which they work together in pairs or groups.

- *Intrapersonal:* Involve students in individual activities that require personal input.

- *Natural World:* Show how the structure/ organization of language relates to things in nature.

Time Guidelines Help

Right emphasizes communicative competency. The majority of the class should focus on presenting and practicing the language. Books should remain closed for most of the class time. Of course, length of classes will vary depending on various factors, however, the timing of a typical class might be:

Warm Up and Review 5 minutes
Presentation and Practice 30 minutes
Games and Activities 15 minutes

Teachers must keep the class lively to maintain students' interest. This involves pacing a class appropriately. Activities should be changed every five to seven minutes to keep students focused and interested throughout the class.

Teacher Tools

Lesson Plans

Right provides comprehensive, step-by-step lesson plans for teaching the Class Book. However, it is essential that teachers customize lesson plans to take into account the different learning styles and needs of the class. Lesson plans should have specific objectives and goals. Activities and exercises should meet the goals outlined in the lesson plan. It is also better to over-plan and have more activities as not all activities will work with all groups of students.

Lessons in the *Right* Teacher's Book use time effectively. Every activity, drill, or game has a purpose in advancing language proficiency. Suggested activities, explanations, and tips are provided throughout the Teacher's Book. Activities and games can be replaced with others to suit the needs of the teacher's individual class.

Visual Aids

Visual aids like flash cards, posters, pictures, illustrations, and realia help to support students' understanding of a new language. These visual aids are valuable because they don't require translation.

Bulletin Boards

Bulletin boards can reflect the interests and aspirations of students while also helping students to get to know each other. These are some tips to get the most out of a bulletin board:

- Designate a space on the bulletin board as a culture corner. Display pictures of other countries and maps. Students can mark places around the world where English is spoken.

- Display student pictures. Be sure that every student has the opportunity to display her/his work.

Use the bulletin board as a means to review material and concepts from previous lessons.

- Set aside a special place on the board for photos. Photos can be of students in the class working together on a project, photos of students on trips or even students at home.

Games and Activities

- Students enjoy games and fun activities. Games and activities are an essential part of any curriculum for language learners. Tips to ensure successful games and activities in class:

- Clearly understand the instructions before explaining the game or activity to students. Have students model each step of the game as the teacher explains it.

- Control and focus the game so that students use the target language in a meaningful and fun way.

Songs

- Singing plays a vital role in students' language development. Every unit of *Right* 2 Class Book contains a song. The Teacher's Book offers detailed activities to enhance each song. Suggestions for making songs a meaningful part of the classroom:

- Choose a new song every month for students to sing as they clean up after activities.

- Play English children's songs while students are working, drawing, or coloring.

Pair and Group Work

- When forming groups for pair or group work, ensure it doesn't cause a major disruption to the class. Consider the personalities and abilities of students. Suggestions for forming groups:

- Utilize the natural placement of students in a class. Group students that are sitting near each other.

- Form groups based on similarities like color of clothing or birthdays.

Team Teaching

Two teachers can bring activities, conversations, and dialogues to life by acting as models for students in front of the class. They can also provide more individualized attention to students.

Modeling

Modeling an activity helps students to understand an activity. It saves time later and helps students to take away the most from an activity. Most importantly, modeling enables you to explain a structure or an activity to students using only English.

Teaching Components

Vocabulary

Utilize the flash cards and posters that are available in *Right* Teacher's Resource Pack to enhance and support students in learning new vocabulary. Also helpful is providing students with actual objects that represent the vocabulary word. Hold up the object or flash card and say the word. Another option is to display a poster on the whiteboard or bulletin board. Have students repeat the vocabulary words several times.

The Teacher's Book provides a number of drills and activities designed to develop and reinforce the students' vocabulary knowledge.

Pronunciation

Check students for correct pronunciation of the words. It is best, however, not to single out individual students and ask them to repeat a word or phrase in front of the class. Instead, have the entire class practice the problematic word or pattern several times. Walk around the class, listening to the pronunciation of students. Later, when the students are in pairs or groups, spend time with individual students who are still having trouble.

It's important to keep in mind that even native English-speaking children have difficulty in learning certain English sounds. Among the sounds that are problematic are *r, l, sh,* and *th*. Therefore, it is important to remain patient with students until they achieve the correct pronunciation.

While correct pronunciation is important, teachers should be aware not to place undue stress upon pronunciation as this can cause frustration in students. Students may become afraid of speaking the new language as they will fear making mistakes. The teacher should keep a careful balance between correcting mispronunciation and creating a lack of confidence in students.

Utilize the audio tracks for each lesson to provide students with correct pronunciation of words and patterns from native English speakers.

Contractions

Right teaches both contracted and non-contracted language, but stresses the use of contractions in order to help students to speak naturally. Students become comfortable and familiar with contractions so they sound more fluent and better understand natural English. Familiarity with contractions also gives students an advantage when they begin to read and write. Contraction cards are provided in the Teacher's Book. These cards show students a simple way to combine two words into one in speech.

Reading

Students should be encouraged to read by looking for the same words or sentences on the page and by pointing to each word as they listen to the audio. In this way, they will get familiar with the words in the lesson and will be able to read what is in the Workbook.

Writing

Students practice letter recognition in a variety of exercises. They also practice printing the letters in tracing exercises that gradually guide them to print entire words and sentences on their own. It's recommended to go over workbook exercises in class that are assigned as homework to enable students to complete the exercises with understanding and confidence.

Teaching Tips

Practical Teaching

These are some practical teaching tips that are of benefit to a teacher in class.

- Establish a signal that students recognize as a sign to pay attention. For example, clap your hands twice, flicker the lights, or ring a bell.

- Prepare students when about to change an activity. This allows students to complete what

they are doing and mentally shift to another activity.

- Create a sense of security in students by establishing a routine that's followed consistently in the class.

- Get feedback from students on the class. Acknowledge their feedback and make the appropriate changes to meet their needs.

English as the Language of Instruction

Right targets EFL students who may not hear English spoken outside of the classroom. However, language input is an essential aspect of learning a new language. Thus, it is of utmost importance to conduct classes in English as much as possible. The tips provided below help to maximize English usage in the classroom.

- All instructions should be given in English. Use gestures, body language, and visual aids to help students to understand.

- Review previously learned language regularly so that it becomes a part of students' English vocabulary.

- Find occasions for students to experience English in a communicative, meaningful, and interesting way. For example, invite a native English speaker to class to talk to students.

Assessment

The teacher should keep track of students through tests, notes, and observation. This ensures that the teacher understands the skills and problem areas of each student. The teacher can also determine which students require further explanation and practice in a particular area or concept.

Correcting Students

- Correcting mistakes is an important role of any teacher. However, as previously mentioned, teachers should find the right balance when correcting students. Pay attention to students' reactions to correction. Some students won't lose motivation or confidence while others will become self-conscious and reticent.

Methods of correction during accuracy-based activities:

- Point out the error, say the correct form, and have the student repeat the correct form.

- Repeat the student's sentence, stressing the error with rising intonation. Then immediately repeat the sentence, pausing before the error, and have the student give the correct form.

Methods of correction during fluency-based activities:

- Rephrase students' mistakes in correct English. It isn't necessary to interrupt students or have them repeat the corrected sentence.

- Sometimes refrain from correcting students during games or particular activities. This enhances motivation and lends a sense of fun and excitement to the class. During group work, monitor students for common mistakes. Once the activity is finished, correct the mistakes with the class as a whole.

Teaching Large Classes

Large classes present special challenges for monitoring student participation and learning. Here are some tips to effectively teach large classes.

- Walk around the classroom and listen as students work in pairs and groups. Note the common areas of difficulty and address them with the whole class at the end.

- When playing a game that requires a lot of movement around the class, divide the class into two groups. One group plays the game while the other does a quiet activity at their desks. Then, the groups change roles.

- Make sure the entire class can see the teaching materials clearly, especially for the students at the back of the class. Use large visual aids or walk around the classroom with the teaching material to enable all students to see and participate.

Introducing Culture

As students become comfortable and familiar with English as a foreign language, encourage and inspire interest in students for other foreign cultures. Introduce flags from different countries. Discuss the daily life of people from other countries. Have students listen to music and look at folk art. Each country has its own set of greetings, money, dances, clothing, and games. Bring these into class to show to students. Embassies and consulates are often more than willing to provide free information about their countries.

Involving Parents in Their Child's Education

Students, whose parents are actively involved in their child's education, generally perform better academically than other students. Students exhibit a higher level of motivation when parents show an interest in their education.
Inform parents of what their children are learning and the progress they're making in the class. Through parents, teachers can also discover aspects of a student's language development that is not evident in class. They can also provide information on students' special needs or problems.

Drills, and Activities

Drills

1 Repetition Drill

Model vocabulary words or new language patterns for the class to repeat. Teacher: *a dog, a dog*. Students: *a dog*. Teacher: *a rabbit, a rabbit.* Students: *a rabbit.*

Alternatively:

Teacher: *This is a red book.*
Students: *This is a red book*.
Teacher: *This is a yellow pencil.*
Students: *This is a yellow pencil.*

2 Substitution Drill

To do a substitution drill, use flash cards or actual objects as cues.

T: *Where are the books?* (show a picture of books on a table) *They're on the table.*

Ss: *They're on the table.*

T: (show a picture of books under a table)

Ss: *They're under the table.*

Alternatively:

T: (show a picture of a bird) *There's a bird. I like birds.*

Ss: *There's a bird. I like birds.*

T: (show a picture of a frog)

Ss: *There's a frog. I like frogs.*

3 Chain Drill

In a chain drill, you should use objects or flash cards as cues. Show an object or flash card to the first student and ask a related question. The student answers and turns to the next student to ask the same question with appropriate substitutions. Continue until all the students have had a chance to ask and answer the question. Divide larger classes into three or four small groups, and have each group do a chain drill.

T: (show a picture of a robot to SI) *What's this?*

S1: It's a robot. (show a picture of a jump rope to S2) *What's this?*

S2: *It's a jump rope.*

4 Six-Second Drill

To make drills fun and exciting, after modeling several times, have students say the vocabulary or sentence in a quick series of three and raise their hands and say, *Finished!* Repeat several times for each word. Doing these drills several times in a series of three, you will be able to have the students say the target language many times even in 1 minute. They will be talking at natural speed (to be the first student to say *Finished*!), and drills become more like games. Phrase drill: *ride a bus*.

Ss: *ride a bus, ride a bus, ride a bus! Finished!*

T: *Again!* (Can you say it better this time? Say *Finished!* and clap two times.)

Ss: *ride a bus, ride a bus, ride a bus! Finished!*

T: *Again!* (add a task)

Sentence pattern drill: *It's in the kitchen.*

Ss: *It's in the kitchen, It's in the kitchen, It's in the kitchen. Finished!*

T: *Again!* (Can you say it faster this time? Say *Finished!* and stand up.)

Ss: *It's in the kitchen, It's in the kitchen, It's in the kitchen. Finished!*

T: *Again!* (add a task)

Question form: *What do you like?*

Ss: *What do you like, what do you like, what do you like? Finished!*

T: *Again!* (Can you say it louder this time? Say Finished! and tap your head!)

Ss: *What do you like, what do you like, what do you like? Finished!*

T: *Again!* (add a task)

Games and Activities for Phonics

5 Duck, Duck, Goose

On the board, write two lists of words with different initial or vowel sounds. For example: *b/p* or *short a/short e*. Designate one list as *List A*, and the other as *List B*. Students sit in a circle. A volunteer walks around the circle, tapping each student on the head and saying a word from either *List A* or *List B*. If the word is from *List A*, the seated student stays seated. If, however, the volunteer taps a student's head and says a word from *List B*, that student (S1) quickly stands up and tries to tap the volunteer on the shoulder before the volunteer has run all the way around the circle and sat down in the S1's spot. If the volunteer is tapped on the shoulder, he/she remains the volunteer. If he/she sits down before being tapped on the shoulder, S1 becomes the new volunteer. Continue in the same way for 5 to 7 minutes.

6 Find Your Partner: Sounds

Use alphabet cards and flash cards illustrating words that begin with those letters. Students walk around the classroom naming their card or saying the sound of their letter, and try to match picture to initial sound. When students find a partner, the two come to the teacher and name their cards. If they do this correctly, they each win a point. If they do not do this correctly, they correct the mistake and do not win a point. Once most students have come to the teacher, have them exchange cards and do the activity again. The student with the most points at the end wins.

7 Guess from the Initial Letter

Put a flash card and the alphabet card corresponding to its initial letter back to back. Hold up the cards with the alphabet card facing students. Elicit the sound of the letter, then point to the flash card and ask *What's this*? Students try to identify it by naming items that start with that initial sound. When a student correctly identifies the picture, turn the card to face the class. Then they repeat the word and its initial sound.

8 Hold Up the Card

Give each student an alphabet card. Say the sound of one of the letters. The students with

the corresponding card hold it up and repeat that letter's sound. For added challenge, say two or more sounds at a time, name letters for which students do not have cards, or gradually say the sounds at a faster pace.

9 I Spy

Make sure there are many items in the classroom which students can name in English. If not, place flash cards of familiar items around the classroom. Say, for example, *I spy something that begins with /b/.* Students look around the classroom and try to name an item that begins with *b*. If they are correct, say *Yes* and give that student(s) a point. If the guess is not correct, reply *No* and have students continue guessing until someone guesses correctly. Give clues to help, if students are having trouble guessing, for example: *It's small, it's red*. Continue in the same way for 5 to 7 minutes.

10 Make the Words

Divide the class into groups of three to four. Give each group a set of alphabet cards with several extra vowel cards. Groups place all cards face down in the middle of the group, and each student takes seven cards. The rest of the cards are left on the desk. A student (S1) begins by looking at his/her alphabet cards to see if he/she can spell a word. If he/she can spell a word, he/she lays out the alphabet cards to make that word on his/her desk, reads the word aloud, then picks up the same number of alphabet cards from the stack. The next student (S2) takes a turn, and tries to make a new word by adding his/her own letters to one of the letters in S1's word. If S2 can make a word, he/ she joins it to the word on the desk like a crossword puzzle and reads the word aloud. If S2 cannot do this, the next student takes a turn. Students continue in the same way until all cards have been used. Students can use their Class Books for reference.

11 Pass the Sounds

Divide the class into groups of five to six. Each group stands in a line. Give the first student in each line (S1) a set of alphabet cards. Show the last student in each line a card illustrating a word that starts with one of those letters. Students whisper the word down each line until it reaches (S1). S1 says the word and its initial sound, then holds up the alphabet card corresponding to that initial sound. If S1 is correct, he/she wins a point for his/her line. If S1 is not correct, other students in line correct him/her. The last student in each line then goes to the front of the line. Continue in the same way until all students have had a turn being at the front of the line. The line with the most points at the end wins.

VARIATIONS:

i. Students pass the initial letter of the item depicted on the card down the rows by writing the letter corresponding to its initial sound on the back of the student in front of them.

ii. Groups whisper the words down the lines in the same way. S1s spell the word they hear with alphabet cards then raise their hands and say the word.

12 Snap

Place a set of flash cards and a set of the corresponding alphabet cards in two piles face down on a desk in the middle of the classroom. Make sure each alphabet card corresponds to the initial letter of one of the flash cards. For

example: *b* matches *ball*.
Simultaneously turn over one card from each pile. Students look at the two cards, decide if they match or not, then snap their fingers if they do match. The first student to snap his/her fingers to correctly identify a match then names each card and wins a point. If the cards do not match or if students do not correctly identify the match, continue play with two new cards. Play until all cards have been turned over. The student with the most points at the end wins.

LARGE CLASSES: Divide the class into groups of six to eight and have each group play as above.

VARIATION: Play with two sets of word cards. For extra challenge, use words with similar spellings.

13 What Letter Does it Begin With?

Divide the class into groups of three to four, and give each group a set of alphabet cards. Show students a set of flash cards that begin with those letters and elicit the words. Then shuffle the cards and place them along the chalk tray facing the board. One of the groups comes to the front of the classroom and places each of their alphabet cards to the left of the flash card that they think begins with that letter. Turn the flash cards around.

Students in the group point to the pictures and letters that match, say the initial sound, and name the picture. For example: *[b], bay*. If some letters and flash cards have not been matched correctly, students rearrange the remaining alphabet cards so that they are beside the pictures that begin with those letters. They again say the initial sounds and name the pictures. Shuffle the cards again and repeat the procedure.

14 What's in the Air?

Face the board and write a letter in the air with your finger. Students try to name the letter and its sound. Do the same with several other letters. A volunteer (S1) then comes to the front of the classroom. Show S1 a flash card. S1 writes the initial letter of that item in the air. The rest of the class tries to identify the letter, naming it and saying its sound. The first student to do so is next to come to the front of the classroom and repeat the procedure. Continue in the same way for 3 to 5 minutes.

15 Write With Your Body

Divide the class into groups of three to four. Give each group a set of alphabet cards. Group members work individually or together to form the letters with their bodies. For example: To form the letter *A*, one student bends over and places his/her hands a short distance in front of his/her feet. Another student places his/her arm across the bent-over student to form the cross stroke. Groups then take turns forming the letters in front of their classmates, and saying words that begin with the letters they are forming.

16 Complete the Sentence

Write the phonics words along the top of the board. Write three incomplete sentences on the board. Divide the class into teams of three or four. The first team to write three sentences with the words in the appropriate blanks wins the game.

17 Draw and Write

Divide the class into pairs. Students in each pair write three sentences containing words

from the lesson. Then they draw a picture to illustrate each sentence and write the sentence as a "caption" under it. Each pair then takes turns showing their pictures to the class and reading their sentences.

18 Match That Word

Divide the class into pairs. A student in each pair (S1) begins by saying a word containing a target sound. S2 says another word with the same target sound. Each correct answer wins the student a point. Pairs continue until a student in each pair has five points.

19 Hold It Up!

Each student writes three consonant blends, each blend on a separate piece of paper. Say a word that contains one of the blends. Students repeat the word and hold up the paper with the correct blend spelling. If a student holds up the wrong blend, that student is "out." Continue with six to eight different words. The students remaining "in" at the end of the game are the winners.

VARIATION: Instead of using blends, play the game using different vowels.

20 Rhyming

Write the unit's phonics words on index cards. Randomly place the cards along the chalktray. One at a time, say one of the words and ask students to say another word that rhymes with it. Continue until all rhyming words have been paired.

21 Zoo Contest

Draw two animals on the board and write their names underneath. Underline a letter in each name. Then divide the class into Teams A and B. Students in each team take turns saying words beginning with one of the two letters. Each correct word wins the team one point. When students run out of words, underline two more letters or draw another two animals and continue as above. Continue for 5 to 7 minutes.

22 Alphabet Game

Write the alphabet in columns on the board, leaving enough space next to each letter to write a word. Divide the class into Teams A and B. Give Team A one die. A volunteer from Team A rolls the die and counts letters of the alphabet, stopping on the letter corresponding to the number on the die. For example: if the volunteer rolls a 6, the letter is *f*. Team A says a word that begins with *f* and the volunteer writes it next to *f* on the board. Team A gives the die to Team B and a student rolls the die and repeats the procedure. Each team receives a point for every letter in the word that they write on the board. Once a word has been written next to a letter, it is skipped when counting letters. The team with the most points at the end wins.

23 Erase and Write

Write 10 to 12 words in a column on the left side of the board. Write various long and short vowel sounds in a horizontal row across the top of the board. For example: write *long e, short e, long a, short a*. Divide the class into Teams *A* and *B*. Volunteers from team takes turns coming to the board and reading one of the words from the list, erasing it, then writing it under the corresponding vowel sound. For example: a student reads *light,* then erases the word from the board and writes *light* below *long i*. If the

student writes the word in the correct column, he/she wins a point for his/her team. If the student does not write the word in the correct column, a student from the other team comes to the board, erases the word, and rewrites it in the correct column. He/She then wins a point for his/her team. If he/she does not write the word in the correct column, correct the student, and neither teams wins a point. Continue in the same way until all words are written below the correct vowel. The team with the most points wins.

24 Walk and Spell

Clear sufficient space for students to walk in the shape of letters. Name a letter and have a volunteer walk in the shape of that letter, as if writing the letter with his/her feet. The rest of the class tries to name the letter and say its sound. The first student to correctly identify the letter is next to "walk and spell" a letter. Continue until most students have taken a turn.

Games and Activities for Vocabulary

25 Around the World

Students sit in a circle. Two volunteers stand up next to each other to begin the game. Show these two students a flash card. The first student of the pair to correctly name the card wins a point. The "loser" sits back down, and the "winner" moves to stand beside the student on his/her left. This student then stands up. Show the new pair a different flash card. The first student of this pair to correctly name the card wins a point, then moves to stand beside the next student. Play continues in this way around the circle. If any student can go around the entire circle without having to sit down, he/she has gone "Around the World," and gets an extra five points.

Continue for 5 to 7 minutes. The student with the most points at the end wins.

LARGE CLASSES: Instead of moving around a circle, students move along the rows of desks.

26 Basketball

Preparation: Make two basketballs by cutting out two circles from orange pieces of paper. On each side of the board, draw a column of six horizontal lines. On the top line, *draw a* basketball hoop. Attach the two basketballs to the board below the bottom line.

Play: Divide the class into two teams and have a student from each team come to the front of the classroom. Show these two students a flash card. The first student to correctly name the card moves *his/her* team's basketball up to the first line. These two students return to their seats and another student from each team comes to the board to name a card. Continue play in the same way. The first team to move their basketball to the hoop wins two points. Return the basketball to the starting position and continue play until a pre-determined number of points is reached. The team who reaches this number first wins.

VARIATIONS:

a Count an incorrect guess as a foul, which results in the loss of one point.

b Students shoot baskets instead of using the lines on the board. Place a wastebasket at the front of the classroom. After correctly identifying a card, students shoot a ball into the wastebasket. If they make a basket, the team gets a point.

27 Bingo!

Prepare *3 X 3, 4 X 4, or 5 x 5* large grids. Give each student one grid and 9, 16, or 25 flash cards face up. Students place a flash card in each square of the grid. One by one, call out the items illustrated on the flash cards. When a named item is on a student's grid, he/she places a marker on the card. If a student marks three (or four or five) items in a row (horizontal, vertical, or diagonal), he/she calls out *Bingo!* then names the cards making up the row, and wins a point. Students then reposition the cards on their grids and play again.

VARIATIONS:

a Give students blank grids. On the board, write a list of words to be practiced. Students choose words from this list and write the word or draw a picture of the item in each grid square.

b Before beginning play, students take turns naming the cards or pictures on their grids.

c If beginning students need more support, hold up the flash cards while calling out the items.

d Instead of calling out the names of items, give only hints about the items. For example: *It's red. It's round*. The first student to say the correct word puts his/her marker on that picture.

e Students try to cover squares to form the shape of a pre-determined letter. For example: *T, F, E, I, L, H.* When a student covers squares in the shape of the pre-determined letter, he/ she shouts *Bingo!*

f Students try to cover every square on their grid. When a student does this, he/she shouts *Blackout!*

g Students try to cover just the four corner squares of their grid. When a student does this, he/she shouts *Bingo!*

28 Concentration: Picture to Picture

Shuffle five to ten pairs of matching flash cards and place them face down on a desk. Students take turns turning over two cards and naming them. If a student cannot name the cards, *he/she* turns the cards face down again and the next student takes a turn. If a student names the cards correctly but they do not match, the cards must also be turned face down, and play moves to the next student. If the student does correctly name the cards and they do match, that student keeps the pair and takes another turn. The student who has the most pairs once all cards are taken wins the game.

29 Concentration: Picture to Word

Prepare five to ten pairs of flash cards and corresponding word cards. Students play Concentration as in Game 11, matching the flash card to the corresponding word card.

30 Concentration: Pairs

When playing either Concentration 11 or 12, have students play in pairs in order to make the game more cooperative.

31 Do It!

Give each student a flash card. Name one of the cards twice, then give a command. For example: *apple, apple, stand up!* Students with

that card name the card, then do the action. For added challenge, name two or three cards with the same command so that more students are doing the actions. For example: *apple, apple, boy, boy, stand up!* Students then take on the teacher's role. Continue in the same way for 4 to 5 minutes.

32 Do You Remember?

Students open their Class Books to the first two pages of the unit, which they have studied, and look at the large scene for 1 minute. When the time is up, students close their books and name as many items as they can.

33 Draw the Picture

Divide the class into two teams. Place the target flash cards into a hat, large envelope, or small bag. Bring a volunteer from each team to the front of the classroom and ask them each to choose a card from the hat. The volunteers then draw a picture of their word on the board and their teams try to be the first to identify the picture. The first team to correctly identify the picture wins a point. The volunteers return to their seats and a new volunteer from each team comes to the board. Continue play until all words have been chosen from the hat. The team with the most points at the end wins.

VARIATIONS:

1 Both volunteers draw the same word.

2 Limit the drawing time to 1 minute. For extra challenge, shorten the amount of time even more.

3 Bring a volunteer from one team to the front of the classroom. Ask *her/him* to choose a word from the hat, then draw that word. The rest of the team guesses what is being drawn. Time how long it takes them to answer correctly. Record the time, then have a student from the other team take a turn in the same way. Continue until all words have been chosen from the hat. At the end of the game, add up each team's times. The team with the shortest time wins.

34 Eyewitness

Divide the class into groups of three to four. Give each group a piece of paper. Place a set of 10 flash cards face down on a desk at the front of the classroom, and have a volunteer from each group come to the desk. Turn the cards face up. The volunteers look at the cards, run back to their groups, and name as many of the cards as they can. Groups then try to be the first to make a list of those items by writing the name or drawing a picture of each one, then raising their hands. Groups take turns saying the words. Both the group that finishes first and the group that has the most correct win a point. Place a different set of 10 cards on the desk at the front of the classroom, bring up different volunteers, and do the activity again in the same way.

35 Find Your Partner: Words

Give each student a flash card, making sure to distribute at least two of each card. Students walk around the classroom naming their card, and try to find another student with the same card. When students find a student with the same card, the two come to the teacher, name their card, and write the word on the board. If they do this correctly, they win a point. If they do not do this correctly, they correct the mistake and do not win a point. Once most

students have come to the teacher, have students exchange cards and do the activity again. Continue in the same way for 5 to 7 minutes. The student at the end with the most points wins.

36 Four Corners

In each comer of the classroom place a sign with a picture representing a unit category. For example: animals, school supplies, nature, fruit. Say a vocabulary word that corresponds to one of the categories. For example: *pen*. Students repeat the word and run to the corner of the room with that category's sign. If students are standing in the wrong corner, they sit down. Continue in the same way until there is just one student left standing.

LARGE CLASSES: Students point to the correct sign instead of running to it.

37 Guess the Card

Divide the class into groups of four to five. Give each group 10—15 flash cards. Each group places their cards face down in a row in front of them. One student in each group touches one of the cards and tries to guess what it is, saying *This is a (tree)*, then turns the card over. If the guess is correct, the card is left face up. If the guess is not correct, the student names the card then turns it back over. Students in each group take turns trying to identify the cards until all cards have been turned over.

38 Guess the Order

Divide the class into groups of three to four. Show students five flash cards, then shuffle the cards and stand them on the chalk tray with the pictures facing the board. Write a number from 1-5 above each card (do not use the same number twice). Groups guess which card is below each number by writing numbers 1—5 on a piece of paper, then writing the name of a card next to each number. A volunteer from each group then writes the group's guesses on the board. Turn the cards to face the class, point to each card, and elicit its name. Groups then check how many cards they correctly identified. The group that correctly identified the most cards wins a point. Any group that correctly identified all the cards wins a bonus point. Continue in the same way for 5 to 7 minutes. The group with the most points at the end wins.

VARIATION: Give each group a set of flash cards. Two groups (Group A and Group B) then join together and stand facing each other. Group A shows Group B their cards, shuffles them, and then places them face down between the two groups. Volunteers in Group B point to each card and try to name it. Group A turn the cards face up. Group B wins a point for each correctly named card. The two groups then change roles and Group A takes a turn trying to name Group B's cards.

39 Guess What's Missing

Place six flash cards on the chalk tray. Students study the cards for 10—15 seconds, then close their eyes. Remove one of the cards. Students open their eyes and try to be the first to raise their hands and identify the missing card. When a student correctly identifies the missing card, he/she wins a point. Play until all cards have been removed from the chalk tray. Then play again, having volunteers take on the teacher's role of removing cards from the chalk tray. The student with the most points at the end wins.

VARATIONS:

1 For extra challenge, remove more than one card each time.
2 Divide the class into two teams. Play as above, with students in each team cooperating to identify the missing card. The first team to correctly identify the missing card wins a point.

40 Hold It Up!

Give each student a flash card. Name one of the items illustrated on the cards. Students with that card repeat and hold it up. For added challenge, name two or three items at a time, name items for which students do not have cards, or gradually name the items at a faster pace. Continue in the same way for 3 to 4 minutes.

41 Hunt for the Words

Hide seven of each flash card around the classroom. Divide the class into groups of three to four. Give each group a set of each of the flash cards hidden around the classroom. Tell all groups how many more of each card they need to find. For example: two flowers, one tree, three birds. Say *Start!* Groups try to be the first to find the required number of cards, then run to the teacher and name those cards. The first group to collect and correctly name all their cards wins.

VARIATION: Two groups play against each other, hiding cards for the opposing group to find. For this activity, the cards for each group need to be a different color.

42 Listen to the Clues

Hold up a flash card with the back of the card facing the class. Give simple clues about the picture and have students try to identify it. For example (banana card): *It's yellow. Monkeys like this.* Do the same with five to seven different cards.

43 Old Maid

Divide the class into groups of four to six. Give each group a set of cards made up of two identical sets of 10 flash cards each, plus one card without a match. This card without a match is the *Old Maid* card. A volunteer in each group then distributes the cards evenly among the members of his/her group. Students look at the cards they have, place any matching pairs on the desk in front of them, and name them. If they are not able to name them, they must keep the cards until the next turn. Students in each group then take turns taking one card from the student sitting on their left. If the new card matches one they have, they name it and put the pair down on the desk. If the card does not match, they keep the card and the next student takes a turn. Students continue in the same way until one student has put down all his/her cards. The student in each group with the most matching pairs at the end wins. The student with the odd card at the end is *Old Maid* and cannot win the game even if he/she has the most matching pairs.

44 Pair Them Up

Prepare two identical sets of flash cards with enough cards for each student to get one card from each set. Distribute the cards from one of the sets among students, giving each student a card. Place the remaining set of cards face down on a desk in the middle of the classroom. Divide the Class into groups of four to six. A volunteer from one of the groups Sl goes to the cards, points to one, guesses what it is, then

turns the card over. If Sl is correct, he/she takes the card and checks to see if it matches a card his/her group has. If it does match, Sl keeps the pair. If it does not match, Sl returns the card to the desk, and a volunteer from another group takes a turn. If Sl does not guess correctly, or cannot correctly name the card, he/ she turns the card back over and a volunteer from another group takes a turn. Continue in the same way until one group has placed all of its cards down as pairs. This group wins the game.

LARGE CLASSES: Divide the class into groups of four to six. Each group then plays as above. The student in each group with the most pairs at the end wins.

45 Pantomime and Guess the Word

Pantomime an action related to a vocabulary word and have students try to identify the word. For example: *(banana)* pantomime peeling a banana and eating it. Continue pantomiming until a student correctly identifies the item. Then bring two to three students to the front of the classroom to take on the teacher's role. Alternatively, students work in groups, with students in each group taking turns pantomiming. Continue in the same way for 5 to 7 minutes.

46 Race Track

Divide the class into groups of five to six. Give each group two sets of flash cards and a die. Groups place their flash cards face up in a circle. Designate a starting point on each group's circle and tell students how many times they must go around the circle to finish. Each student then places a marker on the designated starting point. Students in each group then take turns rolling the die and moving their markers around the circle, one card per number on the die. When students land on a card, they name it. If they correctly name it, they remain on that card. If they fail to name it, they return their marker to where it was at the start of that turn. The first student in each group to complete the required number of rounds wins. For extra challenge, when a student lands on a card and correctly names it, he/she turns it face down so that the next student to land on that card must name it from memory.

47 Run and Find

Attach a set of flash cards to the walls around the classroom. Divide the class into Teams A and B. Bring a volunteer from each team to the front of the classroom. Name one of the flash cards. These two volunteers try to be the first to repeat the word, then run to and touch the named card. The student to first touch the correct card wins a point for his/her team. Another student from each team then comes to the front of the classroom. Play continues in the same way until all cards have been named. Students can also come to the front of the classroom and take on the teacher's role, calling out words. The team with the most points at the end wins.

LARGE CLASSES: Divide the class into groups of three to four and give each group a set of flash cards. Groups then place their cards face up in the middle of the group. Say one of the words. Students in each group try to be the first to repeat the word, then find and hold up the named card. If the correct card is held up, the student keeps it. If a student holds up an incorrect card, he/she returns the card to the desk. Play continues until one group has picked up all their cards. The student in each group with the most cards at the end wins.

VARIATION: Assign a number to each student, making sure that for each number on Team A, there is the same number on Team B. Name one of the flash cards. Then, say a number. The student from each team with that number tries to be the first to run and touch the named card.

48 Slow Reveal

Hold up a flash card with another card or piece of paper covering it so that only a small portion of the picture is showing. Students try to name the picture. Each time a student incorrectly names the picture, slide the covering card down to gradually reveal more of the picture. Continue sliding the cover down until a student is able to name the picture. Continue in the same way with five to seven different cards.

49 Snap

Place a set of flash cards and a set of the corresponding word cards in two piles face down on a desk in the middle of the classroom. Simultaneously turn over one card from each pile. Students look at the two cards, decide if they match or not, then snap their fingers if they do match. The first student to snap his/her fingers to correctly identify a match then names each card and wins a point. If the cards do not match or if students do not correctly identify the match, continue play with two new cards. Play until all cards have been turned over. The student with the most points at the end wins.

LARGE CLASSES: Divide the class into groups of six to eight and have each group play as above.

VARIATION: Play with two sets of word cards. For extra challenge, use words with similar spellings.

50 Tic-Tac-Toe: Words

Divide the class into pairs. Two pairs play against each other. Give each set of pairs nine flash cards. Pairs place the flash cards face up to make a 3 x 3 grid between them. Pairs take turns naming a card in the grid. If the pair is correct, they place their marker on that square of the grid. The first pair to place three markers in a row (horizontal, vertical, or diagonal) wins the game.

51 Touch the Card

Place 10—15 flash cards on a desk in the middle of the classroom. Students gather around that desk. Name a card. Students try to be the first to touch the named card. The first student to touch the correct card and name it keeps the card. Continue in the same way until no cards are left on the desk. The student with the most cards at the end wins. Play again, having a volunteer take on the teacher's role and name the cards.

LARGE CLASSES: Divide the class into groups of four to five. Each group plays as above.

VARIATION: Instead of naming a card, hold up a word card. Students read the word silently and try to be the first to touch and name the corresponding flash card.

52 Verb Relay

Divide the class into Teams A and B, then have each team stand in a line. Give a set of verb flash cards to the first student (S1) in each line. Sl turns to face his/her team, looks at the first card and pantomimes the action for the second student in his/her line (S2). S2 identifies the

action being pantomimed. Then Sl turns over the next card in his/her pile and pantomimes that action for S3 and so on to the end of the line. The first team to finish wins a point. S1 then goes to the back of the line, the student now at the front of the line becomes the new S1, and play continues in the same way. The first team to get five points wins.

53 What Am I Drawing?

Slowly draw a picture of a vocabulary item on the board, pause several times, and ask *What's this?* Using complete sentences if possible, students try to identify the item. The first student to name the item is next to draw. Continue in the same way with four to six volunteers.

54 What's in the Bag?

Place realia of vocabulary items in a bag. A volunteer feels the bag, tries to identify an item without looking at it, then removes it from the bag. If the student identifies the item correctly, he/she keeps it and another volunteer takes a turn. If he/she does not identify the item correctly, the item is put back in the bag and another volunteer takes a turn. Continue in the same way until no items are left in the bag.

55 Where Is It in the Book?

Name an item, a character, or an action from a Class Book unit. Students try to be the first to find the page on which the item, character, or action appears, point to it, then name it. The first student to do so wins a point. Continue in the same way until students have looked at least one-third of the pages they have studied. The student at the end with the most points wins.

Note: As a character or item may appear on more than one page, including pages not yet studied, accept any answer that is correct.

VARIATION: Students find a character in the Class Book and mimic that character's actions or gestures. The rest of the class tries to find that character in their Class Books, and name the character, an item that character has, or what that character is doing.

56 Which Card Doesn't Belong?

Divide the class into two teams. A volunteer from each team comes to the front of the classroom. Give each of these volunteers identical sets of four flash cards, three cards from the same unit or category and one card from a different unit or category. For example: *goat, cat, horse, pencil.* Say *Go!* The volunteers look at their cards, place the card that doesn't belong on the chalk tray, and name it. The first volunteer to place the correct card on the chalk tray and name it wins a point for his/her team. The team wins another point for each card the members of the team can correctly name. Continue in the same way until every student has had a turn. The team with the most points at the end wins.

57 Charades

There are several ways to do this activity, which involves using gestures to express meaning. In its basic form, begin by placing flash cards facedown in a pile. One student takes a card from the top of the pile without showing it to the rest of the class. After looking at the card, the student acts out the word using gestures. The class must guess the action. Instead of using flash cards, you can also simply whisper the word or phrase to the student.

58 Pictionary

This activity involves drawing pictures to express meaning, but more importantly it encourages guessing and recall of previously learned vocabulary. Divide the class into small groups (3-4 students). Give scratch paper and pencils to each group. One student from each group comes up to the front of the class as a representative. Gather the representatives together and whisper a word to them. When the representatives have heard the word, they return to their groups and draw a picture of the word. They can't speak or gesture, only draw. The first team to guess the word correctly gets a point. As a fun alternative, prepare a list of 10 vocabulary items. Instead of whispering the word to the representatives, show them the word at the top of the list. The representatives then return to their groups and draw a picture of the word. When one of the team members guesses the word, he or she comes up and whispers it to you. This student then becomes the new representative. Show this new representative the next word on the list. The activity continues as before. The first team to complete the list wins the game.

59 Telephone

This game practices listening skills and memorization. Divide the class into teams and have them stand or sit in a line looking at the back of the student in front of them. Whisper the same word to the first person in each row. Say Go! and have S1 whisper the word to S2, who whispers it to S3, etc., as fast as possible. The last student then runs to the front of the class and tells the teacher the word. The first student to say the word correctly wins. To make the game more challenging, whisper two to three words or a sentence to S1.

60 Vocabulary Race

Students place vocabulary flash cards face up in a row. S1 begins by touching the card at one end of the row and saying the word. S2 begins at the opposite end of the row. Students work their way toward their opponent's side, pointing to cards and saying the words shown. When students meet somewhere in the middle (both fingers touch the same card), they play rock, paper, scissors. The winner remains, and continues to move toward his or her opponent's first card and the loser returns to the beginning of his or her vocabulary row and starts again. The first student to move from one end of the row to the other wins.

61 Say It!

This activity practices saying vocabulary at random and spontaneously. Divide the class into several groups. Give each group a set of flash cards. Put the cards in a zig-zag line on the table. When you say *Go!*, one student starts at one end of the cards and says a sentence for each card. S2 starts immediately after S1 and S3 follows S2 so that everyone is moving along the cards at the same time. When all the students have finished, rearrange the cards and start again.

62 Hide the Cards

Bring 12 volunteers to the front of the classroom and give each of them a vocabulary flash card. The volunteers hide the cards around the classroom so that only a small portion of each picture is visible to the class. The volunteers then take turns pointing to the picture card they have hidden and asking *What's that?* Seated students try to determine what the picture is (getting up and moving

around the room if necessary) and respond It's a bus. The volunteer says either *Yes, it is*. if the guess is correct, or *No, it isn't*. if the guess is not correct. Continue until all cards have been correctly identified. Then bring eight new volunteers to the front of the classroom and do the activity again.

63 Hit the Cards

Divide students into teams of four to six. Place flash cards, one set per team, faceup on the floor at the front of the classroom. Each team lines up at a designated distance behind their set of cards. Give the first student in each line an eraser. The first student in each line then throws his/her eraser and tries to make it land on one of their cards. If the eraser lands on a card, the student who threw the eraser names that card, picks it up, and takes it back to his/her line. If the eraser does not land on a card, or the student can't name the card, he/she picks up his/her eraser, gives it to the second student in line, and goes to the back of the line. Students then take turns. The first team to collect all their cards wins.

64 Match the Cards

Divide the class into Teams A and B. Write A on the left side of the board and B on the right side. Write the vocabulary words in a horizontal row, one set below A and one set below B. Give each team a set of flash cards that corresponds to the words on the board. A volunteer from each team comes to the board with his/her team's cards. The volunteer from Team A stands in front of the words below A, Team B's volunteer stands in front of the words below B. Say *Go!* Each volunteer tries to be the first to stand their flash cards on the chalk tray in the same order as the words on the board. The student who finishes first shouts *Done!* He/She then points to each flash card on the chalk tray and his/her teammates name it. The team receives a point for each correct match, and a point for each correctly named card. The other team's volunteer then points to his/her cards and his/her teammates name them. This team receives points for any correct matches and for cards they correctly name. The team with the most points at the end wins.

65 Jeopardy

Preparation: Choose five categories (for example: colors, animals, occupations, clothing and snack food). Write the category names in a horizontal row across the top of the board. Under each category write a column of dollar amounts, forming a grid or matrix (for example: $100, $200, $300, $400). Prepare questions for each category. Start with easier questions for the $100 amounts and move to more difficult questions for the $500 amounts. Play: Divide the class into Teams A and B. A volunteer from Team A goes first. That volunteer chooses a category and dollar amount (for example, colors for $200). Ask the volunteer the corresponding question (for example: What color is your shirt?) If the student answers correctly, award Team A $100 and erase the number from the board. Then a volunteer from Team B chooses a category and dollar amount in the same way. Continue until all questions have been asked and answered. The team with the highest dollar amount at the end wins.

Games and Activities for Conversation

66 Back-to-Back

If possible, use toy telephones or old phones. Pair off students and give each student a phone.

Have partners sit back-to-back and pretend they are talking on the phone. When facing away from each other, and since the rest of the class will be speaking, students must speak very clearly and concentrate on what their partners are saying. Have partners practice their dialogue twice, so that each student can practice both parts. Circulate and help as necessary.

67 Beanbag Circle

Have the class form a circle. Toss a ball or a beanbag to Sl and ask a question. Sl responds, tosses the ball to another student (S2), and asks a question. Continue until all students have had a chance to participate. For large classes, play Beanbag Circle in groups so that more students can participate simultaneously.

68 Conversation Lines

Have the students stand in parallel lines facing each other, so that each student has a partner in the opposite line. Partners practice the question-and-answer pattern.

S1: *What's your name?*

S2: *My name is (Sam). What's your name?*

S1: *My name is (John).*

Then have the two lines move one space (left or right) in opposite directions. Have the student with no partner at the end of the line come to the front of the line, so that every student has a new partner. Repeat the dialogue. Listen to the pairs at the front of the lines and help them as necessary.

69 Dialogue Musical Chairs

Place chairs back-to-back in two rows or at random around the room. Have one chair less than the number of students in the class. Play the recording of a song or instrumental music. As the music plays, students move around the room to greet each other and practice dialogue. When the music stops, the students sit down. The student without a chair to sit on is out of the game. Continue the game until there is one student left. For variety, remove two chairs at a time instead of one. The two students who remain standing must say a dialogue together or ask each other questions.

70 Step Away Lines

This activity encourages children to speak loudly. Have students stand in two rows facing each other, so that each student has a partner in the opposite line. Have each pair say a dialogue. Each time a pair completes the dialogue. Both partners take a giant step back and repeat the dialogue again. Every time they do so, they will naturally need to speak louder to be heard by each other.

71 Listen and Act

Two pairs of volunteers (PI and P2) come to the front of the classroom. PI says the conversation, using the Class Book for reference if necessary, and P2 acts it out. PI and P2 then change roles and do the activity again. Another two pairs of volunteers then come to the front of the classroom and do the activity. Continue until most students have taken a turn.

72 Puppets

Each student makes a puppet (see puppet-

making ideas below). Divide the class into pairs and have pairs role-play the conversation using their puppets as the speakers. Make sure students give puppets appropriate gestures and facial expressions. Students in each pair then change roles and role-play the conversation again.

PUPPET-MAKING IDEAS:

1 Students draw pictures of the characters, people, or animals on a paper or cardboard. They then cut out the pictures and glue them onto popsicle sticks or pencils.

2 Students use markers to draw a face on a sock, and glue wool on the sock for hair. Students put their hands in the sock with their thumb in the heel and fingers in the toe. They then bring the tips of their thumbs and fingers together to manipulate the puppet's mouth.

73 Three to a Conversation

Bring three students (S1, S2, and S3) to the front of the classroom. Give S1 a Class Book for reference. S2 and S3 say the conversation. S1 checks for mistakes and corrects if necessary. S2 then holds the Class Book and S1 and S3 say the conversation. They, then sit down. Divide the class into groups of three, and have each group do the activity as above. Students in each group then change roles and repeat the procedure. Continue until all students have taken on each role.

74 Tic-Tac-Toe Conversation

Prepare 3 x 3 grids with one line of the conversation written in each square. Divide the class into pairs. Two pairs (PI and P2) play together. Give each group of pairs one of the 3 x 3 grids. PI, in unison, says one of the conversation lines, then says the next line of that conversation. If they correctly say the lines of the conversation, they place their marker on that square of the grid. Then, P2 takes a turn. The first pair to place three markers in a row (horizontal, vertical, or diagonal) wins the game.

75 Toss the Ball

Toss a ball to a student and say the first line of the conversation. That student responds with the second line of the conversation, and then tosses the ball to another student who says the third line of the conversation, and so on around the class. Students continue until everyone has said a line of the conversation.

76 Which Line Doesn't Belong?

Write each line of four to five different conversations on a piece of paper, and then copy it. Cut up both sheets to make two identical sets of strips of paper, each with one line of a conversation on it. Divide the class into Teams *A* and *B. A* volunteer from each team comes to the front of the classroom. Give each volunteer a set of identical strips of paper which includes a complete conversation plus one strip from a different conversation. For example: *Ah-choo! Bless you! Thanks! What's your first name?* Say *Go!* The volunteers look at their pieces of paper and place the line of conversation that doesn't belong on the chalk tray. The first volunteer to place the correct piece of paper on the chalk tray wins a point for his/her team. The team wins another point for each line of the conversation the members of the team can correctly say. Continue until each student has had a turn. The team with the most points at the end wins.

77 Who Was That?

Bring a student (S1) to the front of the classroom and have him/her face the board. Ask another student (S2) to say the first line of the conversation. S1 tries to identify S2 and say the second line of the conversation. If S1 identifies S2, they finish the conversation together. If S1 does not identify S2, he/she tries again. If S1 still cannot identify S2, he/she turns around to face the class, and S1 and S2 say the conversation from the beginning. Encourage S2 to change his/her voice to make the activity more challenging. Choose another pair of volunteers, and continue the activity in the same way until most students have had a turn.

78 Guess the Line

Write each line of the conversation on a separate piece of paper. Six to eight volunteers (one volunteer for each line of the conversation) come to the front of the classroom, and each picks a piece of paper. The volunteers then take turns looking at their cards and act out that line of the conversation (without words). Seated students try to identify and say each line. Once all the lines have been correctly identified, the volunteers say the lines in order and seated students repeat.

79 Missing Words

Divide the class into Groups A and B. Write the target conversation on the board. Elicit alternate lines from Groups A and B. Erase two to three key words from each line. Groups then change roles and say alternate lines of the conversation, trying to fill in the missing words. Continue in the same way, erasing more words from the conversation each time, until students can say the conversation from memory.

80 The Prompter

Bring three volunteers (S1, S2, S3) to the front of the classroom. Give S1 a Class Book for reference. S2 and S3 say the target conversation. S1, the "prompter" checks to see that they are making no mistakes, and prompts as necessary. S2 then holds the Class Book and S1 and S3 say the conversation. These three volunteers then go back to their seats. Divide the class into groups of three. Groups do the activity as above. Each group repeats the procedure twice so that all students take on each role.

81 Say It Together

Divide the class into Groups A and B and have the two groups stand in two lines facing each other. The two groups take turns saying alternate lines of the conversation in unison, speaking and responding to the student directly across from them. Groups then change roles and practice the conversation again.

82 Set the Timer

Students stand in a circle. Set a timer for 2 minutes. Toss a ball to a student and say the first line of the conversation. That student responds with the second line of the conversation, then tosses the ball to another student who says the third line of the conversation, and so on around the circle. Students toss the ball and say the conversation quickly so that they are not holding the ball when the timer rings. The student holding the ball when the timer rings says the entire conversation with the student who tossed him/her the ball. Prompt if necessary. Then set the timer to 1 minute and do the activity again. Students should say the conversation lines

correctly even though they are speaking quickly.

83 Unscramble

Write the conversation on the board in scrambled order. Students try to be the first to unscramble and write down the conversation, then raise their hands. The first two students to do so raise their hands and read alternate lines of the conversation.

84 Write the Next Word

Write the conversation on the board. Point to each line and elicit the conversation. Erase the entire conversation. A volunteer says the first word of the conversation and writes the word on the board. Students then take turns adding the next word to each line of the conversation until it is completely written on the board.

Games and Activities for Grammar

85 Complete the Sentences

Make a list of incomplete sentences, such as *I like __ , I can __ , I'm __ .* Say one of them. A volunteer repeats, filling in the blank with an appropriate word. If the volunteer completes the sentence correctly, *he/she* wins a point. If *he/she* does not complete the sentence correctly, any other student can complete the sentence and win a point. Say another incomplete sentence and have another volunteer take a turn. Continue until most students have had a turn. The student with the most points at the end wins.

VARIATION: Do the activity in groups, with students from each group taking turns coming to the front of the classroom, choosing a strip of paper with the incomplete sentence written on it, and returning to his/her group to read the sentence. The rest of the group completes the sentence.

86 Guess Who

Divide the class into groups of four to six. Place six flash cards face down on a desk at the front of the classroom. One of the groups comes to the front of the classroom and each member takes one of the cards. Students in the other groups take turns asking questions using the target pattern to determine each student's card. For example: *(Pat), do you like apples?* If the student has the apples card, he/she answers *Yes, I do*, and gives the card to the group that asked the question. That group then takes another turn. If the student does not have the *apples* card, he/she replies *No, I don't*, and another group takes a turn. Groups continue in the same way until the group at the front of the classroom has no cards left. Another group then comes to the front of the classroom.

87 Memory Chain

A student (S1) makes a statement using the target pattern. For example: *I like apples*. The student sitting next to or behind him/her (S2) says S1's name, repeats the statement, then adds his/her own statement. For example: *Jim, you like apples. I like bananas*. The student sitting next to or behind S2 (S3) then repeats S1and S2's statements, and adds his/her own. Students continue in the same way until someone is unable to repeat all the previous statements.

88. Pass the Message

Students work seated in rows. The first student in each row (S1) thinks of a statement using

the target pattern and whispers it to the second student in the row (S2). S2 whispers the statement to the third student in the row (S3). S3 then whispers the statement to S4, and so on down the row. When the statement reaches the last student in the row, he/she says it aloud. If it matches S1's original statement, the row wins a point. If it does not match S1's original statement, the row does not win a point. Students in each row then move forward one seat and do the activity again.

VARIATION: Play as above, but have the last student ask a question using the question form of the statement. For example: S1: *I like pizza.* Last student: *(S1's name), do you like pizza?*

89 True or False

Using grammar sentence patterns, prepare 10—20 statements, some true and some false (try to make the false statements as humorous as possible'). For example: *I'm Mr. Smith. I'm an astronaut. I have ten brothers and nine sisters.* Say one of the statements. Students who think the statement is true go to the front of the classroom, and those who think the statement is false go to the back of the classroom. Students who were correct and can repeat the sentence win a point. Continue in the same way until all the statements have been read. The student with the most points at the end wins.

90 What's Different?

Bring four to six volunteers to the front of the classroom. Give each volunteer a flash card. Have the volunteers hold their cards so that the rest of the class can see them. Seated students make statements about the volunteers using the grammar pattern and the card the volunteer is holding. For example: if the grammar pattern is *He/She likes (burgers)* and a volunteer is holding the *salad* card, the student says *(Mary) likes salad*. When a statement has been made about each volunteer, seated students close their eyes and three to four of the volunteers exchange cards. Students then open their eyes and make statements about the students who changed cards. For example: *(Ken) likes salad.* Another four to six volunteers then come to the front of the classroom and do the activity again in the same way.

91 Living Sentences or Dialogues

This activity encourages students to think about sentence structure and word order. Select sentences from present or previous units. Divide the class into groups and assign one sentence to each group. Each student in the group is assigned one word in the sentence. Students are not allowed to speak except to repeat their words. They arrange themselves in the correct order. For dialogues, students are assigned sentences rather than words.

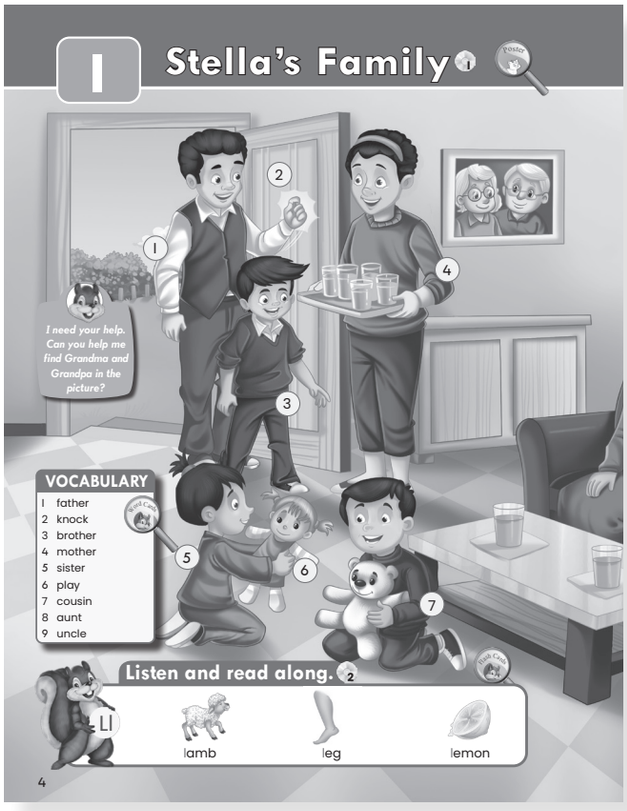
92 Sentence Dictation

Read sentences aloud and have students write them on a piece of paper. Dictate longer sentences for advanced classes, and short, simple sentences for lower-level classes.

93 Scrambled Sentences

This activity practices word order and sentence patterns. Have pairs of groups arrange word cards into complete sentences. Set a time limit and have students see how many correct sentences they can make using the cards. Or, have students put entire sentences to make a complete conversation.

Right Phonics Sample Page and Lesson Plan



One to four phonics sounds are presented per unit. Students listen to the recording for correct pronunciation of the sounds.

Generally, three examples are provided with pictures for each phonics sound. Students look at the picture and listen to the recording for correct pronunciation of the words.

Warm Up and Review

1 Review previous learned phonics sounds with a game or activity. Games and activities are provided in each lesson plan.

2 Check the *Right* Activities page that students did in class or for homework. The Class Book Answer Key is provided at the back of the Teacher's Book.

Introduce the Sounds

1 Hold up the Class Book with the phonics words. Point at the word and picture. Say the target sound. Then, say the entire word. Repeat this process three times. Students should focus on the teacher's pronunciation and remain silent. Then students should repeat after the teacher on the fourth repetition. Students should say the target sound and entire word on his or her own two times without the help of the teacher.

2 Write each target word on the board in the following way: Write the target letter. Say its sound while pointing to the letter. Students repeat. Write the rest of the word on the board, pointing to the two parts of the word and then the whole word. Students repeat.

Practice the Sounds

Have students focus on the target letters, pictures, and words at the top of the page in the phonics section. Play the recording. Students listen and repeat, pointing to the pictures and words in their books.

Games and Activities

Students practice the phonics sounds through three activities and games. Some activities and games focus on the target sound while others focus on reviewing previously learned sounds.

Additional Practice

Explain and assign a phonics worksheet. Worksheets can be done at home or in class. They can be given to students who need extra help or stronger students who finish their work before others. Worksheets can be found at the back of the Teacher's Book.

Wrap it Up

1 End the lesson with a simple and quick game or activity to further practice the phonics sounds. An activity is provided in each lesson plan.

2 Explain and assign the phonics exercises in the *Right* Activities section to be done in class or for homework. It is important that students understand the exercises so they can concentrate on the target sounds. Detailed instructions on how to do the activities are provided at the back of the Teacher's Book.

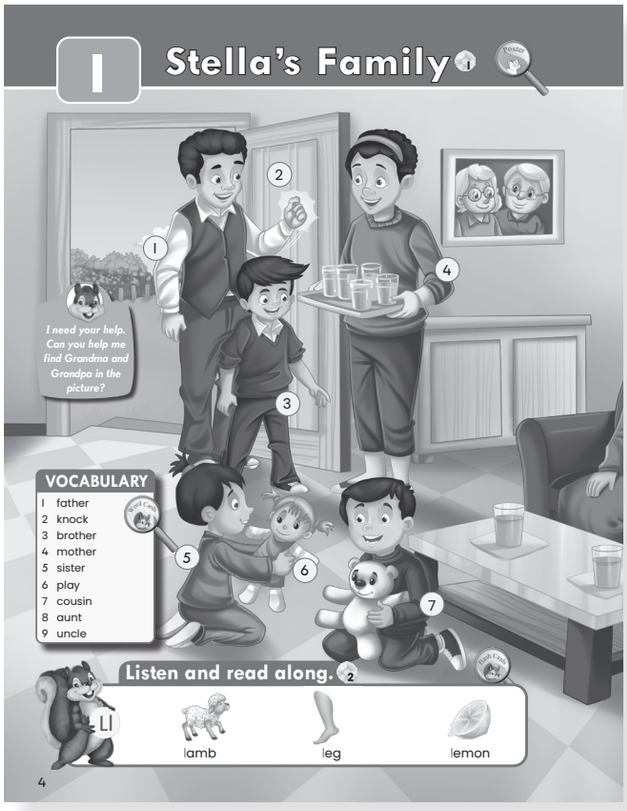
Right Vocabulary Sample Page and Lesson Plan



A large poster of the main scene is provided for practice and games in the classroom.

Nine to twelve vocabulary words are introduced per unit. Students review the words by saying and listening to the recording of the words for correct pronunciation.

Vocabulary words are presented in a set of flash cards.

All new vocabulary words are featured in the context of the main scene.

A question from Bebo the squirrel requires students to find something in the main scene that adds to their vocabulary.

Warm Up and Review

1 Review previously learned vocabulary with a game or activity. Games and activities are provided in each lesson plan.

2 Check the *Right* Activities page that students did in class or for homework. The Class Book Answer Key is provided at the back of the Teacher's Book.

Introduce the Words

1 Hold up the vocabulary flash cards one at a time. Say the word slowly while students listen. Then hold up the flash cards again and have students repeat the vocabulary words. For extra challenge, have students name the flash cards in random order.

Discuss the Main Scene

1 Students open their Class Books to the main scene. Say a vocabulary word while students find the picture which represents the word in the main scene and point at it.

2 Have students name anything else they can in the main scene.

3 Talk about what is happening in the main scene to recycle language and bring the picture to life. It is not important that students understand each word. This is a receptive exercise focusing on exposure to English and recycling previous language in a new context. Another option is to use the big poster to talk about the main scene.

4 Ask questions about the main scene in order to engage students further. Allow students

to answer questions using words, phrases, or simple sentences. Provide the answers if necessary. Suggested questions are provided in each lesson.

5 Read the Bebo question in the corner of the first page of the unit and have the entire class try to find the item in the main scene. Provide the answer if necessary.

Practice the Words

1 Have students focus on the words in the vocabulary box. Play the recording. Students listen and repeat, pointing to each word in the vocabulary box.

2 Play the recording. Students listen to each vocabulary word and find the item in the main scene.

3 For extra vocabulary, have students focus on the reading passage on the next page. Write the extra vocabulary words listed in each lesson plan on the board and read them. For meaning, draw simple pictures of the words on the board and name them in the students' native language.

Games and Activities

Students practice the vocabulary words through three activities and games. Some activities and games focus on the target vocabulary so students only focus on new words. Other games and activities allow students to practice the new vocabulary in combination with other meaningful language they know.

Additional Practice

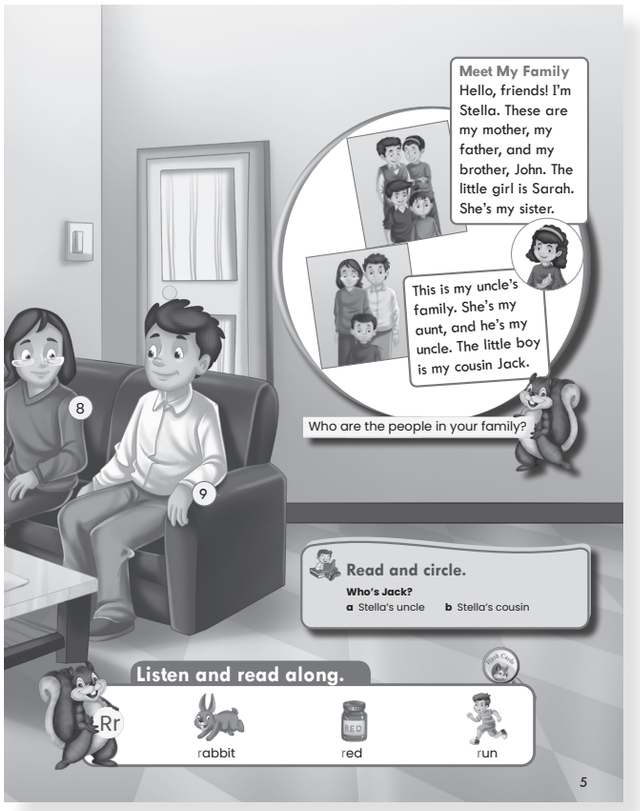
Explain and assign a vocabulary worksheet. Worksheets can be done at home or in class. They can be given to students who need extra help or stronger students who finish their work before others. Worksheets can be found at the back of the Teacher's Book.

Wrap it Up

1 End the lesson with a simple and quick game or activity to further practice the vocabulary words. An activity is provided in each lesson plan.

2 Explain and assign the vocabulary exercises in the *Right* Activities section to be done in class or for homework. It is important that students understand the exercises so they can concentrate on the target vocabulary. Detailed instructions on how to do the activities are provided at the back of the Teacher's Book.

Right Reading Sample Page and Lesson Plan



A short reading passage of between six and ten sentences is introduced. Students listen to the recording and follow along in the reading passage.

The reading passage incorporates some of the vocabulary of the unit.

The reading passage incorporates the grammatical structure of the unit.

A discussion question at the end of the reading passage allows atudents to discuss and engages the entire class.

Warm Up and Review

1 Review the reading passage from the previous unit. Get a volunteer to give a very short summary of what the reading passage was about. Students don't have to give the summary in correct grammatical English as long as they understand the reading passage.

Introduce the Reading

1 Students' Class Books should remain closed as the teacher reads the new reading passage. The teacher should read in a raised voice to make sure all students can hear. In addition, the teacher should read in an enthusiastic and appropriate voice for the passage to engage students.

2 Students now open their Class Books to the reading passage. The teacher reads the passage for a second time with a raised and clear voice as students follow along. The teacher should concentrate on reading the passage more slowly this time to enable students to follow along.

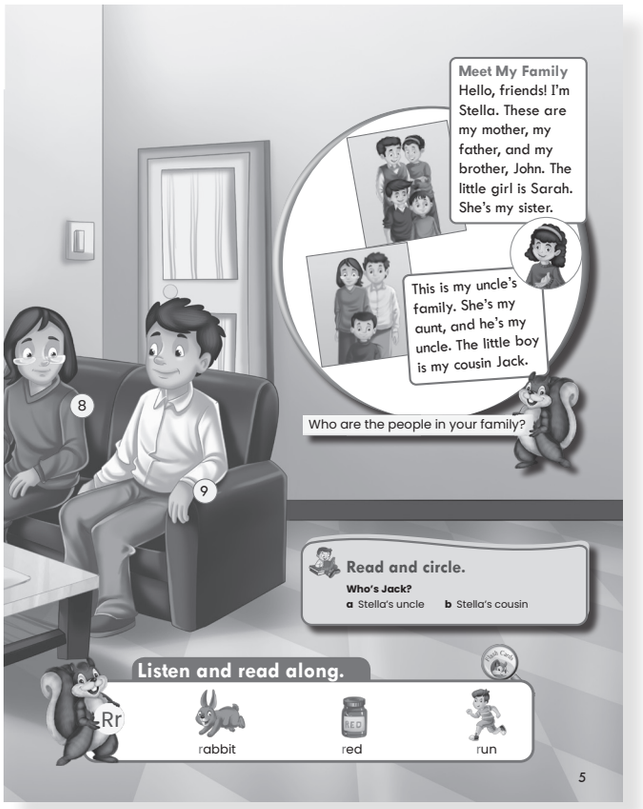
Practice the Reading

1 Have students focus on the reading passage. Play the recording. Students listen and repeat along with the narrator of the story as much as they can. Students should point at each word as they read along.

2 Discuss the reading passage with students. Elicit questions about what they read. Explain difficult vocabulary words.

3 Discuss the question with the class. Have students answer the question in words, phrases, or simple sentences.

Right Comprehension Sample Page and Lesson Plan



A set of one to two questions assesses students' comprehension of the reading passage.

Some questions include the vocabulary and grammar patterns of the unit.

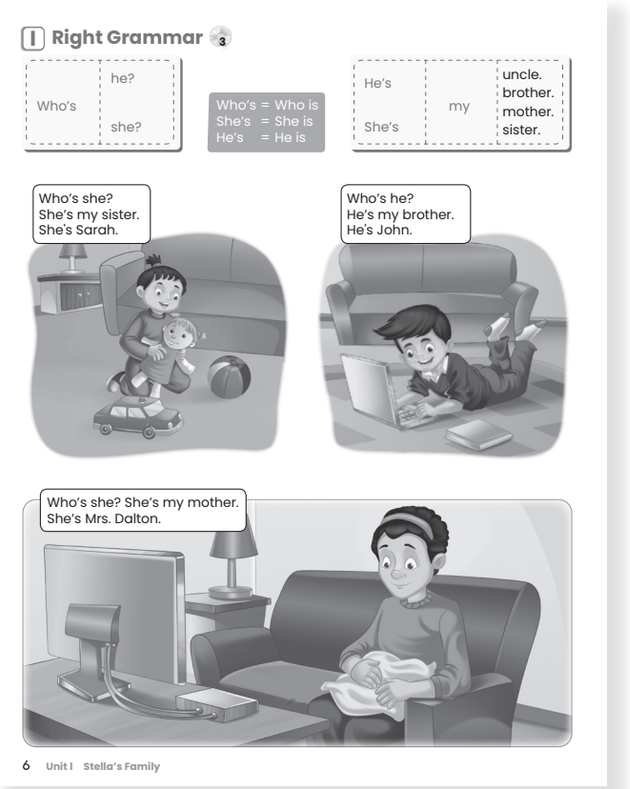
Warm Up and Review

1 Review the comprehension questions from the previous unit. Ask the same questions again and elicit the answers from students. Optionally, new questions can be added to the comprehension questions.

Introduce the Comprehension

1 Ask each comprehension question carefully and slowly. Repeat the question again if necessary. Elicit the answer to each question from the entire class. Go over incorrect answers. Optionally, ask additional comprehension questions to further assess students.

Right Grammar Sample Page and Lesson Plan



The grammar patterns are presented as complete sentences. Students listen to the recording for the correct pronunciation.

The grammar patterns are presented in between two to four pictures that help to provide meaning.

The reading passage incorporates the grammatical structure of the unit.

The Bebo grammar box provides explanation of any contraction within the grammar patterns.

Warm Up and Review

1 Review the previous learned grammatical patterns with a game or activity. Games and activities are provided in each lesson plan.

2 Check the *Right* Activities page that students did in class or for homework. The Class Book Answer Key is provided at the back of the Teacher's Book.

3 Review any previous grammatical pattern that pertains to the target structure. For example, review *I like ice cream* before introducing *Do you like ice cream?*

Introduce the Patterns

Introduce the target patterns in a methodical, step-by-step fashion. Once students are familiar with the patterns, provide an activity which allows students to practice using the patterns immediately. Detailed instructions are provided in each lesson plan. Explicit instruction of grammar rules is neither necessary nor recommended in the lower levels, as it could prove too overwhelming.

Practice the Patterns

1 On the board, write the patterns from the grammar boxes at the top of the page on the board, so students can see the patterns clearly. Students listen while the teacher plays the recording. Point at each word on the board.

2 Play the recording a second time. Students should follow along in their books by listening, looking, and repeating the grammar patterns.

3 Students now try to say the grammar patterns on their own. Prompt if necessary, or play the tape again until students can do this with ease.

4 Now, have the students shift focus from the grammar boxes at the top of the page, and have them focus on the Bebo boxes at the bottom of the page. Most Bebo boxes contain the written out form of the contractions in the grammar patterns. Sometimes additional information like how to form plurals of other words is provided in the Bebo box.

5 Write the explanation of the contractions on the board. Point to and read each word. Students repeat. Then say each pattern with the full form of the contraction(s). Students repeat. Students practice each pattern using both contractions and the full form of the contractions.

Games and Activities

Students practice the grammar patterns through three activities and games. Three games or activities are provided in each lesson plan.

Additional Practice

Explain and assign a grammar worksheet. Worksheets can be done at home or in class. They can be given to students who need extra help or stronger students who finish their work before others. Worksheets can be found at the back of the Teacher's Book.

Wrap it Up

1 End the lesson with a simple and quick game or activity to further practice the grammar patterns. An activity is provided in each lesson plan.

2 Play a *Right* song from the back of the book. Have students listen to the song first. Play the song again and have students try sing along.

3 Explain and assign the grammar exercises in the *Right* Activities section to be done in class or for homework. It is important that students understand the exercises so they can concentrate on the target vocabulary. Is this a flower? Yes, it is.
Is that a cloud? No, it isn't.
This is a tree.
That is a cloud.
These are trees.
Those are clouds.
Are these red flowers? Yes, they are.
Are those yellow ducks? No, they aren't.

2 Play the recording a second time. Students should follow along in their books by listening, looking and repeating the grammar patterns.

3 Students now try to say the grammar patterns on their own while looking at the patterns in their Class Books. Prompt if necessary, or play the tape again until students can do this with ease.

4 Now, students shift focus from the grammar boxes at the top of the page, to the Bebo box at the bottom of the page.

Work with the Pictures

Students should focus their attention on the pictures and have them find and name any items they see in the eight scenes. Also, have them name the characters in the story. These can be single words or phrases. Then talk about what is happening in each scene to review the language and bring the pictures to life.

*Stella's **mother** is in the kitchen cooking. It looks like she is cooking a soup or stew. She looks happy. Do you ever help your mom to cook? John and his **father** are in a shop buying school supplies. What has John bought? What are the two things that he is holding? John's **father** is holding a **blue** notebook. Jack and Sarah are having fun on the playground. Sarah is swinging on the swings and Jack is having fun running through the grass. Stella's **aunt** and **uncle** are very careful when they drive in a car. They wear seatbelts and stay safe. Stella is upset because she thinks John didn't get her any art supplies. But he did buy her art supplies! So where are they? Oh, no! Sarah has been using them, and she has paint all over her face. Do you like the picture Sarah drew of Stella? Stella doesn't like it!*

Practice the Reading

3 For extra vocabulary, have students focus on the reading passage on the next page. Write *animal*, *favorite*, *scary,* and *zoo* on the board. Read the words. For *animal*, point to the picture of the panther, tiger, dog, and even Bebo. Each time when pointing at a different picture, say *animal*. Optionally, show pictures of other animals. For *favorite*, explain that *favorite* is something you like the most. Ask students for their *favorite* colors. For *scary*, explain that is a feeling when one is afraid of something. The volunteer has only one chance. The volunteer chooses a card and turns it over. If it is the correct card, the volunteer keeps the card and gets a point. If incorrect, the volunteer turns the card facedown again, and another volunteer tries to find the card.

2 **Basketball**. Use Units 1 – 4 vocabulary words. (see Game 26, page 23)

Warm-Up and Review

1 **Pick and Say.** Use the vocabulary flash cards from Unit 3. Spread them face down on the desk. Ask for 11 volunteers to come to the front of the class. One volunteer steps forward and chooses a card. The volunteer shows the card to the class and says its name. The volunteer then sits down and the next volunteer takes a turn. Continue until all the flash cards have been named.

2 Check the grammar exercises in the *Right* Activities page that students did in class or for homework. For Class Book Instructions and Answer Key, see the back of the teacher's Book.

Introduce the Patterns

repeats the question to the volunteer while pointing at the volunteer, *Do you want a doll?* Then say *Yes, I do*. Only the volunteer repeats while still holding the paper. Then, the entire class repeats. Take the paper from the volunteer and set it aside. Then say *No, I don't.* Only the volunteer repeats at first. Then, the entire class repeats.
Explain, say, and have students repeat the rest of the grammar patterns on both *Right* Grammar pages that were not covered in the grammar boxes above.

Practice the Patterns

1 Write the grammar patterns on the board, so students can see the patterns clearly. Students listen while the teacher plays the recording. Point at each word on the board.

3 Students now try to say the grammar patterns on their own while looking at the patterns in their Class Books. Prompt if necessary, or play the tape again until students can do this with ease.

4 Now, students shift focus from the grammar boxes at the top of the page, to the Bebo boxes at the bottom of the page.

5 Write the explanation of the contractions on the board.

What's = What is

Point to and read each word. Students repeat. Then say each pattern with the full form of the contraction(s). Students repeat. Students practice each pattern using both contractions and the full form of the contractions.

Games and Activities

1 **Pantomime.** Bring ten volunteers to the front of the class. Hand each volunteer a flash card. Exclude the verbs from the flash cards. Work with the Pictures

Students should focus their attention on the pictures and have them find and name any items they see in the eight scenes. Also, have them name the characters in the story. These can be single words or phrases. Then talk about what is happening in each scene in order to review the language and bring the pictures to life.

What's wrong Tom? He's in pain. Helen is worried. Look! Tom is fine now. Helen and Tom are talking on the phone. Tom is at home watching TV. The lady in the blue shirt and pink tie is the art teacher, Mrs. Wilson. She is showing the class how to draw a vase of flowers. Mrs. Wilson is on the phone. What's wrong with Tom? Is he in trouble?

Work with the Text

Focus students' attention on the reading boxes under the scenes. Students try to guess or read the text in the reading boxes. Prompt when necessary.

Practice the Reading

1 Pl*a*y the recording of the story. Students should listen while they follow along in their Class Books. Optionally, students can follow the story in the Big Book.

1 *Tom feels sick. Helen gets the doctor to help him.*

2 *Helen calls Tom to ask how he feels today. Tom tells Helen he feels fine now. Helen asks Tom to go with her to their art lesson.*

3 *Tom tells Helen he is busy watching TV.*

5 Yummy ... I Like It!

Right Phonics

Sound focus: long e *(bee, feet, sleep, meat, read, tea)*
Materials: CD, alphabet cards

For general information on *Right* Phonics see pages 38–39.

Warm-Up and Review

1 Say *Long* or *Short a.* Say words that have a *long* or *short* a sound. After each word, students say whether the word has a *long* or *short* a sound.

Suggestions: *ant, cake, pass, late, had, main, rat, shape, plant, spray, pan, face*

2 Check the phonics exercises in the *Right* Activities page that students did in class or for homework. For Class Book Instructions and Answer Key, see the back of the Teacher's Book.

3 Check exercises in Unit 4 Workbook that students did for homework. For Workbook Instructions and Answer Key, see the back of the Teacher's Book.

Introduce the Sounds

Note: The *long e* sound is written as /ē/.

1 Hold up the Class Book and show the phonics section of the text to the class. Point at the picture of the *bee* and its word. Say */ ē / - / ē /, bee,* stressing the *long e* sound. Repeat this process three times. Students should focus on the teacher's pronunciation and remain silent. Then students should repeat after the teacher on the fourth repetition. Students should say the target sound and entire word on their own two times without the help of the teacher. Continue this process with the rest of the phonics words.

2 Write *ee* on the board. Say */ ē /* while pointing to the letter. Students repeat. Add *b* to the left of *ee*. Say */b/-/ee/, bee* pointing to the two parts of the word and then the whole word. Students repeat. Repeat this process for the rest of the words.

Practice the Sounds

Have students focus on the *long* e words at the top of pages 40 and 41. Play the recording. Students listen and repeat, pointing to the pictures and words in their books.

long e bee, feet, sleep, meat, read, tea

Games and Activities

1 **E Drill.** Say 10 to 12 words that have a *long e* and *short e* sound. Students say the word, clap once if it is *short e* sound and clap twice if it is a *long e* sound, and then say whether it is *long* or *short e*. For

Bebo Item: *I need your help. Can you help me to find the jello in the picture?*

Materials: CD, vocabulary flash cards, poster

For general information on *Right* Vocabulary see pages 40–41.

Warm-Up and Review

1 **Pick and Say.** Use the vocabulary flash cards from Unit 4. Spread them face down on the desk. Ask for 12 volunteers to come to the front of the class. One volunteer steps forward and chooses a card. The volunteer shows the card to the class and says its name. The volunteer then sits down and the next volunteer takes a turn. Continue until all the flash cards have been named.

2 Check the vocabulary exercises in the *Right* Activities page that students did in class or for homework. For Class Book Instructions and Answer Key, see the back of the Teacher's Book.

Introduce the Words

1 Hold up and name the vocabulary flash cards one at a time. Say the word slowly while students listen. Then hold up the flash cards again and have students repeat the vocabulary words. For extra challenge, have students name the flash cards in random order.

2 Demonstrate the meanings of some of the vocabulary words in the following ways.

carry: Hold a book with both hands and say *carry.* Then have students hold a book or other item and say *carry*.

happy: Smile broadly for the class and say *happy* while pointing at your face. Students repeat. Students then smile broadly and repeat *happy* again.

look: Look around at the class and while doing so and point at your eyes and say *look*. Students repeat. Then students copy the action of the teacher and repeat *look*.

Discuss the Main Scene

1 Students open their Class Books to the main scene on pages 40 – 41. Say a vocabulary word while students find the picture which represents the word in the main scene and point at it.

2 Have students name anything else they can in the main scene.

3 Talk about what is happening in the main scene to recycle language and bring the picture to life. It is not important that

students understand each word. This is a receptive exercise focusing on exposure to English and recycling previous language in a new context.

Optional: Use the big poster to talk about the main scene.

Harley, Helen and Hansel are all gathered at the dining table. Do you think they are eating dinner or lunch? Most likely they are eating dinner because of the types of food that are on the table. Harley is very happy while holding his knife and fork. He is very happy about the food his mom has cooked. Not so with Helen! She is quite upset. Why? She doesn't want the soup. Her mother is shocked. She thought Helen would like the soup. What is Hansel doing? He's looking at all the food on the table. There is so much food he doesn't know what he should eat.

4 Ask the following questions while pointing at the pictures.

What color are the cupboards in the kitchen?
What kind of juice is there to drink?
What is Helen's mom carrying the soup on?
Why is Helen putting out her hands in such a way?
What is Helen's mom wearing over her clothes?

5 Read the Bebo question in the corner of the page to the entire class. Ask students to find the item in the main scene. Provide the answer if necessary.

I need your help. Can you help me to find the jello in the picture?

Practice the Words

1 Have students focus on the words in the vocabulary box. Play the recording. Students listen and repeat, pointing to each word in the vocabulary box.

1 *kitchen*
2 *carry*
3 *fruit*
4 *meat*
5 *fish*
6 *rice*
7 *chicken*
8 *happy*
9 *look*
10 *tablecloth*

2 Play the recording. Students listen to each vocabulary word and find the item in the main scene in their Class Books or on the big poster.

3 For extra vocabulary, have students focus on the reading passage on the next page. Write *restaurant*, *eat*, *week*, and *many* on the board. Read the words. For *restaurant*, point to the picture of Tom and Helen in a *restaurant* on page 41. Explain that a *restaurant* is a public place where people eat food. For *eat*, pantomime an action of chewing on something. Have students pantomime the same action while repeating, *eat*. Explain that *eat* means to put food in our mouths and chew on it. Also, explain that we can't *eat* water, juice, milk, or anything else that is a liquid. We drink liquids and we don't *eat* them. Show a calendar or draw one on the board. Point to each day of the *week*, and then circle the seven days of the *week* as a whole group and explain that this is a *week*. Students repeat the word. Draw seven

to ten circles on the board. Then draw the same amount of another shape like squares. Point to the whole group and explain that this is *many*. Spread a lot of pencils, markers, or any other item on the desk and say *many*. Students repeat.

Games and Activities

1 **Hop by the Number.** Tack or tape up the flash cards on the board. Write a number under each card from 1–10. Then say the name of the vocabulary word on the flash card. Students find the correct flash card on the board, and read the number underneath it. Then they hop the same number of times as the number under the card. For example, say *kitchen*. Students find the *kitchen* flash card on the board. If the number under the *kitchen* flash card is 3, then students hop three times. Continue for 5 to 6 minutes.

2 **Draw the Picture.** (see Game 33, page 24)

3 **Listen to the Clues** (see Game 42, page 27)

Additional Practice

Explain and assign Worksheet 14. For Worksheet Instructions and Answer Key, see the CD.

Wrap it Up

1 **Touch the Card.** (see Game 51, page 29)

2 Explain and assign exercise B for students to do in class or as homework. For Class Book Instructions and Answer Key, see the back of the Teacher's Book.

For general information on *Right* Vocabulary see pages 40–41.

Warm-Up and Review

1 **Find the Card**. Place the Unit 5 vocabulary flash cards in various places around the classroom. Name a vocabulary word and students point to it.

2 Check the vocabulary exercises in the *Right* Activities page that students did in class or for homework. For Class Book Instructions and Answer Key, see the back of the Teacher's Book.

Introduce the Words

1 Hold up and name the vocabulary flash cards one at a time. Say the word slowly while students listen. Then hold up the flash cards again and have students repeat the vocabulary words. For extra challenge, have students name the flash cards in random order.

2 Display the Unit 6 poster on the board. Repeat the same process again while pointing at the pictures on the poster.

Discuss the Main Scene

1 Students open their Class Books to the main scene on pages 46 – 47. Say a vocabulary word while students find the picture which represents the word in the main scene and point at it.

2 Have students name anything else they can in the main scene.

3 Talk about what is happening in the main scene to recycle language and bring the picture to life. It is not important that students understand each word. This is a receptive exercise focusing on exposure to English and recycling previous language in a new context.

Optional: Use the big poster to talk about the main scene.

What time does Helen get up in the morning? She gets up at six o'clock in the morning. That's pretty early in the morning, isn't it? How early do you wake up? When Helen gets out of bed she makes the bed. Do you help your mom like that in the morning? It's important to brush your teeth every day and Helen is making sure to keep her teeth clean and healthy. Helen eats her breakfast. In school, Helen participates by raising her hand. When school is finished Helen waves goodbye to her teacher. When Helen gets

home she has lunch. Do you know what time Helen eats lunch? Helen does her homework as every good student should. Helen goes to sleep at nine o'clock so she can be ready and refreshed for the next day.

4 Ask the following questions while pointing at the pictures.

What is Helen holding in her hand as she brushes her teeth?
What time does Helen eat breakfast?
What color is Helen's backpack as she heads to school?
Who is Helen waving to as she leaves school?
What kinds of things are sitting on Helen's desk?

5 Read the Bebo question in the corner of the page to the entire class. Ask students to find the item in the main scene. Provide the answer if necessary.

I need your help. Can you help me to find Helen stretching her arms in one of the pictures?

Practice the Words

1 Have students focus on the words in the vocabulary box. Play the recording. Students listen and repeat, pointing to each word in the vocabulary box.

1	*get up*	**6**	*have a class*
2	*make the bed*	**7**	*go home*
3	*brush teeth*	**8**	*eat lunch*
4	*eat breakfast*	**9**	*do homework*
5	*go to school*	**10**	*go to sleep*

2 Play the recording. Students listen to each vocabulary word and find the item in the main scene in their Class Books or on the big poster.

3 For extra vocabulary, have students focus on the reading passage on the next page. Write *breakfast, learn, class,* and *sleepy* on the board. Read the words. For *breakfast*, point to the picture of Helen eating *breakfast* and explain that *breakfast* is a meal that is eaten in the morning. For *learn*, point to the students in the class and explain that they are learning English. Ask them what other things they are learning in school. If the question is difficult, then ask students to name the subjects and then explain that they are learning these subjects. For *class,* point to the surrounding *class* and explain that they are in English *class*. Pantomime a yawn and stretch for *sleepy*, and explain that *sleepy* is a feeling you get when you are ready for bed.

Games and Activities

1 **Pantomime the Card**. Divide the class into three groups, Group A, B, and C. Give each group three vocabulary flash cards. Start with Group A and have a student stand up with one flash card to show the class. Another student from the group pantomimes the word for the class. If the student is correct, that group wins a point. If not, the group must give their flash card to the next group, which would be Group B. Group B goes next and so on until all the flash cards have been pantomimed.

2 **Supply the Verb**. Say a noun from one of the vocabulary phrases. For example, *teeth*. Students must complete it with the appropriate verb, brush teeth.

1 **Pass the Message**. Use Unit 6 grammar patterns. (see Game 88, page 36)

2 Check the grammar exercises in the *Right* Activities page that students did in class or for homework. For Class Book Instructions and Answer Key, see the back of the Teacher's Book.

Introduce the Patterns

1 **What time is it? It's five o'clock in the morning. It's one o'clock in the afternoon.** Stand a wall clock on the board or a desk. Set the clock to read *five o'clock*. Draw two pictures on the board. For the first picture, draw a tree and then a sun high in the sky. Label this picture *morning*. For the second picture, draw a tree and then a sun in the middle of the sky. Label this picture *afternoon*. Ask *What time is it?* while pointing at the clock. Students repeat. Point to another clock in the classroom or point at your wrist watch and repeat the question. Students repeat. Point at the clock that reads *five o'clock* and answer *It's five o'clock in the morning*. Now point at the picture labeled *morning*. Say *morning* and students repeat. Repeat the question first pointing at the clock when saying *It's five o'clock* and then the picture labeled *morning* when saying *in the morning*. Students repeat twice. Now set the wall clock to read *one o'clock*. Ask again *What time is it?* while pointing at the clock. Students repeat. Point to another clock in the classroom or point at your wrist watch and repeat the question. Students repeat. Point at the clock that reads *one o'clock* and answer *It's one o'clock in the afternoon.* Now point at the picture labeled *afternoon*. Say *afternoon* and students repeat. Repeat the question first pointing at the clock when saying *It's one o'clock* and then the picture labeled *afternoon* when saying in the *afternoon*.

2 **What day is it today? It's Monday.** Hold up a calendar for the class to see. Point at each day of the week. Say each day and students repeat. Then ask *What day is it today?* while pointing to *Monday* on the calendar. Students repeat. Ask the question again and students repeat. Then answer while still pointing at *Monday* on the calendar *It's Monday*. Students repeat.

3 **What month is it? It's January.** Hold up a calendar for the class to see. Point at each *month* on the calendar. Say each *month* and

students repeat. Then ask *What month is it?* while pointing to *January* on the calendar. Students repeat. Ask the question again and students repeat. Then answer while still pointing at *January* on the calendar *It's January.*

Explain, say, and have students repeat the rest of the grammar patterns on both *Right* Grammar pages that were not covered in the grammar boxes above.

Practice the Patterns

1 Write the grammar patterns on the board, so students can see the patterns clearly. Students listen while the teacher plays the recording. Point at each word on the board.

What time is it? It's five o'clock in the morning. It's one o'clock in the afternoon.
What day is it today? It's Monday.
What month is it? It's January.

2 Play the recording a second time. Students should follow along in their books by listening, looking, and repeating the grammar patterns.

3 Students now try to say the grammar patterns on their own while looking at the patterns in their Class Books. Prompt if necessary, or play the tape again until students can do this with ease.

4 Now, students shift focus from the grammar boxes at the top of the page, to the ordinal numbers and months at the bottom and along the sides of the pages.

5 First, write the ordinal numbers on the board. Point to and read each word. Students repeat.

1st first	*7th seventh*
2nd second	*8th eighth*
3rd third	*9th ninth*
4th fourth	*10th tenth*
5th fifth	*11th eleventh*
6th sixth	*12th twelfth*

6. Then, write the months on the board.

January
February
March
April
May
June
July
August
September
October
November
December

Point to and read each word. Students repeat.

Games and Activities

1 **Pair Conversation.** Divide the class into pair groups. Write each of the grammar questions and answer patterns on a separate card. For example, write *What time is it*? on one card and the answer *It's five o'clock in the morning* on a separate card. Stand in front of a pair group. Hold up one of the question pattern cards to one student in the group. The student repeats the question. Then hold up an answer pattern card to the other student in the group. The students repeats the answer. Continue with the rest of the groups in the class rotating the question and answer patterns.

2 **Name the Day or Month.** Hold up a calendar for the class. Point to a month or day. Elicit

its name from the class. Continue for 5 to 6 minutes.

3 **Memory Chain.** (see Game 87, page 36)

Additional Practice

Right Phonics

Sound focus: long u *(blue, glue, Sue, flute, June, tube)*
Materials: CD, alphabet cards

For general information on *Right* Phonics see pages 38–39.

Warm-Up and Review

1 **Duck, Duck, Goose**. Use Unit 7 phonics words. (see Game 5, page 19)

3 Check exercises in Unit 7 Workbook that students did for homework. For Workbook Instructions and Answer Key, see the back of the Teacher's Book.

Introduce the Sounds

1 **Note**: The *long u* sound is written *as /ū/*.

2 Hold up the Class Book and show the phonics section of the text to the class. Point at the picture of the blue paint *tube* and its word. Say */ū/ - /ū/, blue*, stressing the *long /ū/* sound. Repeat this process three times. Students should focus on the teacher's pronunciation and remain silent. Then students should repeat after the teacher on the fourth repetition. Students should say the target sound and entire word on their own two times without the help of the teacher. Continue this process with the rest of the phonics words.

Students take two large steps forward if they hear a *long u* word, and two large steps backward if they a word with another long vowel sound. If the word does not have a long vowel sound, students remain still. If a student moves incorrectly, he/she goes to the back of the classroom and starts over. The first students to reach the front of the classroom wins.

Right Vocabulary

Topic: Clothes

Language Focus: Clothes, verbs, nouns *(pay, find, cap, jacket, shorts, tie, socks, closet, dress, clothing store)*

Bebo Item: *I need your help. Can you help me to find the purse in the picture?*

Materials: CD, vocabulary flash cards, poster, paper, money (1 JD)

For general information on *Right* Vocabulary see pages 40–41.

Warm-Up and Review

1 **Name the Card**. Hold up a Unit 7 vocabulary flash card. Students name the card. Continue until students have named all of the flash

Introduce the Words

1 Hold up and name the vocabulary flash cards one at a time. Say the word slowly while students listen. Then hold up the flash cards again and have students repeat the vocabulary words. For extra challenge, have students name the flash cards in random order.

2 Demonstrate the meanings of some of the vocabulary words in the following ways.

pay: Draw a pencil or pen on the desk. Write 1JD as a price underneath the picture. Ask for a volunteer to come to the front of the class. Give the volunteer the 1 JD to put in a pocket or hold in his/her hand. Have the volunteer point to the pencil or pen on the board and smile and nod his/her head. Explain to the class that he volunteer wants to buy the item. Explain that the volunteer has to give you 1JD to *pay* for the item. The volunteer then hands over the 1JD. Say *pay* as the student does so and the students repeat. Give the student a real pen or pencil to hold and show to the class. Ask for another volunteer to come to the front of the class and repeat the process.

find: Place an item like a pencil, eraser or book on the desk. Cover the item with papers, books, or other things so it is not visible. Ask for two volunteers to come to the front of the class and find the item. As the volunteers search for the item, point to them and say *find*. Students repeat. Ask for another two volunteers to come to the front of the class and repeat the process.

Discuss the Main Scene

1 Students open their Class Books to the main scene on pages 64 – 65. Say a vocabulary word while students find the picture which represents the word in the main scene and point at it.

2 Have students name anything else they can in the main scene.

3 Talk about what is happening in the main scene in order to recycle language and bring

the picture to life. It is not important that students understand each word. This is a receptive exercise focusing on exposure to English and recycling previous language in a new context.

Optional: Use the big poster to talk about the main scene.

Sarah's mom is paying for a purchase with money. She is holding the money in her hand and about to give it to the clerk at the front desk. Clerks help us to pay for things that we want. Helen is trying to find something in the clothing store. John is thinking about the things in his closet. He has a black jacket and a green cap. There are many different types of clothes in the clothing store. Does the store sell shorts? Yes, they do! There are green, yellow, orange, purple, and brown shorts to choose from. Does it look like a big store? It's probably not very big although the picture may not show the true size of the store.

4 Ask the following questions while pointing at the pictures.
How many people are wearing some type of blue clothing?
Who is standing near the shorts?
What is Helen's mom carrying on her shoulder?
What color is Helen's dad's suit jacket?
What is Sarah's mom wearing?

5 Read the Bebo question in the corner of the page to the entire class. Ask students to find the item in the main scene. Provide the answer if necessary.

I need your help. Can you help me to find the purse in the picture?

Practice the Words

1 Have students focus on the words in the vocabulary box. Play the recording. Students listen and repeat, pointing to each word in the vocabulary box.

1 *pay*
2 *find*
3 *cap*
4 *jacket*
5 *shorts*
6 *tie*
7 *socks*
8 *closet*
9 *dress*
10 *clothing store*

2 Play the recording. Students listen to each vocabulary word and find the item in the main scene in their Class Books or on the big poster.

3 For extra vocabulary, have students focus on the reading passage on the next page. Write *wear, hot, great,* and *everywhere* on the board. Read the words. For *wear*, explain that we *wear* clothes. Explain that we *wear* pants, shirts, dresses, and caps. For *hot*, pantomime being *hot* by fanning yourself, wiping your head, and looking tired. Say *hot* and students repeat and then they pantomime the action of being *hot*. For *great*, explain that *great* means something that is very good. For *everywhere*, start pointing at different places in the classroom including places like the ceiling. Have students start pointing at different places too and have them repeat the word *everywhere* each time they point at a different place.

Games and Activities

1 **Say Your Clothing**. Each student stands up one at a time and tries to name one piece of clothing that he/she is wearing. For example, if a student

is wearing a *cap*, then the student stands up and says *cap*. If a student is not wearing any clothing that is on the vocabulary list, i.e. *pants*, then the teacher chooses a piece of clothing that the student is wearing, names the clothing and students repeat.

2 **Simon Says.** Have students stand in a circle together in the middle of the classroom. Then say a vocabulary word followed by an action the students should do. For example, say *pay, touch your cheeks.* Students say the word and then touch their cheeks. Those students who don't step out of the circle. Continue in this way 5 to 6 minutes.

3 **Eyewitness**. Use Units 7--8 vocabulary words. (see Game 34, page 25)

Additional Practice

Explain and assign Worksheet 23. For Worksheet Instructions and Answer Key, see CD.

Wrap it Up

1 **Find Your Partner: Words** (see Game 35, page 25)

3 Check exercises in Unit 8 Workbook that students did for homework. For Workbook Instructions and Answer Key, see the back of the Teacher's Book.

Introduce the Sounds

1 Hold up the Class Book and show the phonics section of the text to the class. Point at the picture of the *cap* and its word. Say */a/ - /a/, cap*, stressing the */a/* sound. Repeat this process three times. Students should focus on the teacher's pronunciation and remain silent. Then students should repeat after the teacher on the fourth repetition. Students should say the target sound and entire word on their own two times without the help of the teacher. Continue this process with the rest of the phonics words.

2 Write *a* on the board. Say */a/* while pointing to the letter. Students repeat. Add *p* to the right of *a*. Say */a/-/p/*, *ap* pointing to the two parts of the word and then the combination. Add *c* to the left of *a* and say *ca - /p/, cap,* pointing to the two parts of the word and then the whole word. Students repeat. Repeat this process for the rest of the words.

Note: The *long a* sound is written as */ā/*.

3 Hold up the Class Book and show the phonics section of the text to the class. Point at the picture of the *calendar (day)* and its word. Say */ā/ - /ā/, day,* stressing the *long /ā/* sound. Repeat this process three times. Students should focus on the teacher's pronunciation and remain silent. Then students should repeat after the teacher on the fourth repetition. Games and Activities

1 **Dictation**. Students make two columns on a piece of paper and label one *short a* and the other *long a*. Say *cap*. Using their Student Books for reference, students write *cap* in the *short a* column. Do the same with the other phonics words. Say each word again and have students repeat and say its vowel sound. Check answers by writing *short a* and *long a* on the board, then having a volunteer come to the board and write the words he/she wrote in each column.

2 **Which Long Vowel Is It?** Use Units 4 – 8 vowel sounds. Write the following on the board: *Lake, lake, it's long a! Tree, tree, it's long e! Kite, kite, it's long i! Snow, snow, it's long o! June, June, it's long u!* Point to and read each line. Students repeat. Say a word with any of these long vowel sounds. 3 Talk about what is happening in the main scene in order to recycle language and bring

the picture to life. It is not important that students understand each word. This is a receptive exercise focusing on exposure to English and recycling previous language in a new context.

Optional: Use the big poster to talk about the main scene.

Helen's dad and uncle are playing **chess***.* **Chess** *is a board game that takes a lot of* **thinking***. Helen's uncle is thinking a lot. Helen's dad is making a move on the* **chess** *board. 2 Play the recording. Students listen to each vocabulary word and find the item in the main scene in their Class Books or on the big poster.

3 For extra vocabulary, have students focus on the reading passage on the next page. Write *always, stop, game,* and *wearing* on the board. Read the words. For *always*, explain that *always* means something that is done often, many times or a lot. Then explain that Helen's dad wins at chess a lot. For *stop*, have students wave their hands at you. Say *stop* and have students put down their hands. Explain that *stop* means an action that is no longer done. Walk from one end of the classroom to the other end. In the middle of the room, *stop* walking and repeat *stop*. Students repeat. Explain that a *game* is an activity that is usually done by two or more people. *Games* are usually fun. One volunteer at a time reads the word(s) on his/her card and keeps the word hidden from the rest of the class. The volunteer pantomimes the word(s) on his/her card. Students try to name the vocabulary. Continue with the rest of the volunteers.

Additional Practice

Explain and assign Worksheet 26. For Worksheet Instructions and Answer Key, see the CD.

Wrap it Up

1 **Cross the River.** Place the vocabulary flash cards on the floor in a winding manner. A volunteer names the cards one by one while stepping next to each card named until the last flash card. The volunteer gets help from other students in naming the cards. If the volunteer names a card incorrectly, another volunteer is picked to continue to try to cross the river.

2 Explain and assign exercise B for students to do in class or as homework. For Class Book Instructions and Answer Key, see the back of the Teacher's Book.

What's he doing? He's taking a shower. What's she doing? She's cooking. What's it doing? It's drinking milk. What are they doing? They are washing the dishes. What are you doing? We're preparing lunch.

2 Play the recording a second time. Students should follow along in their books by listening, looking and repeating the grammar patterns.

3 Students now try to say the grammar patterns on their own while looking at the patterns in their Class Books. Prompt if necessary, or play the tape again until students can do this with ease.

Games and Activities

1 **Whisper and Pantomime**. Ask for a volunteer to come to the front of the class. Whisper a question and answer pattern in the ear of the volunteer. The volunteer pantomimes the pattern for the class. Students say the pattern. Continue with the rest of the grammar patterns from page 84 to 85.

Work with the Pictures

Students should focus their attention on the pictures and have them find and name any items they see in the eight scenes. Also, have them name the characters in the story. These can be single words or phrases. Then talk about what is happening in each scene to review the language and bring the pictures to life.

Jack and his parents are standing on the sidewalk. Jack is pointing to his uncle who is driving by in a car. What color is the car? Jack is now pointing at the kids playing in the water. They look like they are having fun. You can also have fun just watching them as Jack and his parents are doing. Do you know how to swim? Now Jack's parents are watching TV and inviting Jack to come and join them. Jack doesn't want to watch TV though. He is waiting for his cousin, Sarah to come so they can play together. Sarah has come for a visit and they are playing together with their cats and cars. The adults are enjoying coffee and tea in the living room while the kids play outside. Now what are Sarah and Jack doing? They are having fun with ice cream and the whole family is smiling and laughing. Kids will be kids.

Work with the Text

Focus students' attention on the reading boxes under the scenes. Students try to guess or read the text in the reading boxes. Prompt when necessary.

Practice the Reading

1 Play the recording of the story. Students should listen while they follow along in their Class Books. Optionally, students can follow the story in the Big Book.

1 *"Look, Mom and Dad! That's Uncle. What's he doing?" Jack asks. "He's driving a car," Dad answers.*

2 *"What are those boys doing, Dad?" Jack asks. "They are swimming in the water. They are having a lot of fun," Dad replies." I'm having a lot of fun watching them, too," Jack says.*

3 *"Mom and Dad! What are you doing now?" Jack asks. "We're watching TV. There's a good program on about animals," Mom says.*

4 *"What are you doing, Jack? Do you want to watch the program?" Dad asks. "No thanks, Dad," Jack replies.*

5 *"Mom, when are Aunt and Uncle coming? I'm bored. I want to play with Sarah," Jack says. "They are coming soon," Mom answers.*

6 *"Look, Sarah! What's that cat doing?" Jack asks. "It's playing with the mouse. The cat likes to play, too," Sarah answers.*

7 *"I'm glad Aunt and Uncle are visiting. What are they doing?" Jack asks. "Aunt is drinking coffee. Uncle is drinking juice," Dad says.*

8 *"What are you doing, children?" Mom asks. "We are having fun," Sarah says. "We are having fun with ice cream," Jack adds. "You are so funny!" Dad laughs.*

2 Play the recording for a second time. Have students follow along and repeat the story as much as they can.

Games and Activities

1 **Basketball.** Use Units 9 – 10 vocabulary words. (see Game 26, page 23)

2 **Complete the Sentences.** Use Units 9 – 10 grammar patterns. (see Game 85, page 35)

Wrap it Up

Listen and Pantomime. Divide the class into groups of four, and have students in each group take on the role of one of the characters in the story. Play the recording. Students listen and pantomime their role. Repeat the procedure until each student has pantomimed each role.

Teaching Contractions

First, show students the two cards with the original words (e.g., I am). Say the words and have students repeat. Students continue to say the two words as you move the cards closer and closer to each other. When the cards overlap, then say the contraction form and replace with the contraction card. Students say the contraction form several times. Then have students alternately say both forms of the words, and explain that both forms have the same exact meaning.
